

Conceptboard for Project Teams – Visual Collaboration on Ideas and Documents

Collaborate effectively on documents without any e-mail hassle

- ✓ Real time workspaces for your projects
- ✓ Files, versions and comments all in one place
- ✓ Cross device access from anywhere
- ✓ Asynchronous working with scribbles, diagrams, comments, tasks and reports
- ✓ Conference features (e.g. Video-Chat) available
- ✓ Full control of workflows and state of work

Shared Workspaces for Globally Operating Teams

Conceptboard offers a central and secure platform where you can share and discuss documents and project material together with your team. All team members have access to the latest status at any time, even if they are scattered all over the planet. Votes are taken asynchronously on content level, video chat or conference features can be enabled if necessary.

Free Collaboration on any Document

Integrating your documents in Conceptboard and starting a team discussion is really easy. Use drag'n'drop to upload various formats and arrange the content on your boards. All participants can open and comment the documents independent of installed software; simply in their browsers. This even works on the iPad.

Reduce E-Mail Traffic and Speed up Decision Making

Conceptboard helps you keeping track of all the files and different versions that accumulate in a work process. But it also collects your colleagues and customers comments in one place. No more endless email searching for the latest version of a file or the full picture of a working draft. It's all in your boards and from here you control and delegate upcoming tasks and workflows.
