CORE SERVICES

SALESFORCE IMPLEMENTATION

Whether you're just starting out with Salesforce for the very first time or need re-evaluate your initial setup, we can help. We use an Agile methodology to mitigate cost, increase adoption and prevent scope creep.

APPLICATION DEVELOPMENT

Sometimes using out-of-the-box applications will not always fit your unique business needs. Whether it's making simple customizations in Salesforce or building out a new application, our agile approach to software development provides the right people, processes and tools for the problem at hand.

DATA MIGRATION

As you business grows and changes, so do your systems and data needs. Ventas Consulting can help you assess, plan and execute a successful data migration project.

SALESFORCE INTEGRATION

Within your company you typically have other applications that you work with on a daily basis that may not be designed to work with Salesforce out-of-the-box or the way you want it to. Our team has extensive experience when it comes to integrating your applications to Salesforce.

REQUEST YOUR SALESFORCE RISK ASSESSMENT TODAY!

In today's business climate, it's more important than ever to prove ROI in both your time and money resources before a project even begins. And, staying ahead of the competition requires a high sense of urgency and more innovation than ever.

During the risk assessment, we will analyze your current usage of salesforce.com, introduce you to the latest productivity features, recommend best practices for utilization of the latest Force.com technologies and ideas on improvements that will meet short- and long-term goals. **Contact us today at 1.877.778.3113 or email us at info@ventasconsulting.com.**
