

roundCause

Events

roundCause Events allows you to plan, execute and measure custom events with native functionality that provides for the management of venues, tickets, meals, reserved seating arrangements, and public registration forms. Make organizing and running your next event seamless with roundCause Events.

Features

Event Details: Create custom event types. Define and manage event logistics, sessions, registration and your own custom attributes. Track speaker, sponsor, vendor, and volunteer information.

Event Planning: Multiple event support for organizing conferences. Create and assign planning activities and tasks to different team members and follow chatter messages for event updates.

Tickets, Items, and Meals: Create tickets with multiple discount codes and items for registrants to purchase as well as meals and special meal types to meet dietary restrictions.

Registration: Manage registration, guests and waitlists. Invite attendees and monitor registration status values.

Calendar: Display sessions and planning events in one calendar with the capability to print a run of show.

Reporting: Generate an Event profile report that includes venue, meal, session, and attendee information with the click of a button. Run reports on attendance, payment status, and seating.

Social: Share event details on Facebook, Twitter, LinkedIn, and Google +.

Venues and Seating: Designate venues, customize seating arrangements, and drag and drop registrants to assign seats.

On-Site Check-in: On the day of the event access a public check-in page to update attendance and other attendee status information.

Sessions: Use sessions to break out smaller parts of an overall event. Have different ticket, venue, and attendance structures on a session-by session basis.

Forms: Develop fully customizable single or multiple page registration forms that allow registrants to sign up for events, sessions, meals and tickets.
