Address Manager

Address Manager by OnPath is an add-on for the standard Salesforce.com Account object. It provides the Salesforce.com user with an easy way of transferring the address information from an Account to all of the Contacts linked to the account.

Location Finder

Location Manager by OnPath is a mash up application that uses Google maps to work out the distance between two accounts in Salesforce.com and display a map and driving instructions. Now you can calculate mileage for expenses super fast.
