

# Update Contact Addresses Pro

## Description

Placing this custom link on the Account layout will allow users to copy either Account standard address to either standard address one or many related Contact records. This is useful for correcting address information or for mass updates of information when the address for an account changes.

## Package Components

| Name                         | Type                  | Type |
|------------------------------|-----------------------|------|
| AjaxStatus                   | Static Resource       | 📄    |
| MUCP Help                    | Custom Link           | ●    |
| MUCP_Test                    | Apex Class            | ✕    |
| MUCPDisplay                  | Visualforce Component | ⬆    |
| MUCPErrors                   | Visualforce Component | ⬆    |
| MUCPErrorsController         | Apex Class            | ✕    |
| MUCPro                       | Visualforce Page      | ⬆    |
| MUCPro Controller            | Apex Class            | ✕    |
| MUCPro Extension             | Apex Class            | ✕    |
| Update Contact Addresses Pro | Custom Link           | ●    |
| Update_Contact_Addresses     | Custom Link           | ●    |
| UpdateContactAddresses       | Visualforce Page      | ⬆    |
| UpdaterStatus                | Visualforce Component | ⬆    |

■ = Model, 📄 = Custom Tab, ● = Custom Link, ⬆ = View  
 📄 = Static Resource, ✕ = Controller

## Features & Benefits

- Uses a simple Visualforce page to update contacts
- Saves time and makes it easy for organizations to maintain updated data
- Opens conveniently inside the active window
- Does not require API access

## Setup

| Step    | Description                                                                              |
|---------|------------------------------------------------------------------------------------------|
| Step #1 | Download and deploy Visualforce and Apex code, and custom link included in this package. |
| Step #2 | Add the new custom link to your Account Page layouts.                                    |
| Step #3 | View any Account page and select the link to use the component.                          |

## Requirements

|                        |                                                  |
|------------------------|--------------------------------------------------|
| External Service       | None                                             |
| Salesforce.com Edition | Group<br>Professional<br>Enterprise<br>Unlimited |

## Specifications

|           |                         |
|-----------|-------------------------|
| Publisher | X-Squared On Demand LLC |
| Type      | Native                  |
| Pricing   | Free                    |
