

Online Grants Management System

WHAT CUSTOMERS SAY

"Utah Technology Commercialization and Innovation Program (TCIP) had historically been managed exclusively through an Excel-based process. To have both the application process and the review process in CommunityGrants with a back-end database through Salesforce.com has provided several efficiencies in our overall process for the TCIP program. CommunityGrants has allowed us to make a more uniform and trackable process for our judges as they review and analyze projects. Overall, we have achieved some definite "net" efficiency gains."

*David Bradford
Program Director TCIP
Utah Governor's Office of
Economic Development*

"The CommunityGrants app is a remarkable online grants management system that works on the Force.com platform. It was easy to build grant applications, check on the progress of applications, and set up panelists to review online. I was able to assist applicants and panelists on the fly with and technical support they needed. I highly recommend this app for agencies that want to streamline their grant processes. After going through a year of webinars on other systems, CommunityGrants is the best solution for our agency."

*Jeanette Albert
Program Administrator
Colorado Creative Industries*

BENEFITS

- Zero Hardware Costs
- Zero IT Infrastructure Costs
- Zero IT Employee Costs
- Annual Subscription
- Industry Best Security & Privacy
- PCI Compliant
- Disaster Recovery
- Lower Cost of Ownership
- Immediate ROI
- Customizable
- Scalable
- Open API for Integrations
- Extendable
- Ready-to-go Out of the Box
- User & Portal User Permissions

CommunityGrants, a Software-as-a-Service (known as SaaS) application built on the Force.com platform, is an online grants management system designed to aid in the application, review, distribution, and management processes of competitive funding opportunities.

The CommunityGrants App is the result of numerous iterations where feedback and recommendations were provided by applicants, reviewers, grant administrators, and board members, during the entire development cycle. What this means is that YOU created the app.

CommunityGrants integrates with and leverages existing features and functionality of the award-winning Salesforce.com Client Relationship Management system (CRM). This integration to the CRM gives your organization a complete 360 degree view of your constituents, customers, students, or clients with whom you interact on a regular basis.
