Salesforce Consultancy

Zumzum's implementation, integration and customisation consultants have many years proven track record in delivering Salesforce.com CRM successfully.

Zumzum can help you with everything from best practices to customising Salesforce to help improve your business or building bespoke applications. Zumzum can help you with all aspects of getting maximum productivity and return on investment from Salesforce and Force.com. We'll help you configure workflows, custom objects, validation rules, user interface, reports, dashboards and more.

Force.com Development

Zumzum has many years of experience developing solutions on the Force.com platform. We'll leverage the power and agility of Force.com to meet your specific business requirements. We have significant expertise in the use of Visualforce and Apex and have built an extensive library of Apex and Visualforce components, which can be rapidly incorporated in your solutions, saving time and development costs. Developing your application on Force.com is 5 times faster and half the cost of traditional development tools.

Force.com Sites

Force.com Sites enables the rapid development of websites hosted on Salesforce.com. Zumzum can help you port existing web-sites into sites or develop new sites from scratch. Force.com sites allows you to link Salesforce data directly to your customer facing sites, for inbound or outboudn data manipulation.
