

Discuss your drafts' details in Conceptboard, but keep your Chatter group updated with automatic reports.

"Working with geographically dispersed teams can be tedious and inefficient. Conceptboard makes review processes of proposals, project presentations and creative design concepts a lot more effective while significantly reducing the number of iteration cycles."

David Schärff, Account Supervisor and Global Project Lead at SapientNitro

"Working together on one concept document makes the project progression significantly easier – independent of time and space. A sure recommendation and in my view the Tool of The Year."

Philipp Schlosser, Senior Concept Developer at 21Torr interactive

"We use Conceptboard now for all of our proposals and our potential new clients love using the system! They are always impressed how good it looks and how easy it is to use."

Jason Blumer, Chief Innovation Officer at Blumer & Associates, CPAs, PC

INSTANT WHITEBOARDS FOR SOCIAL ENTERPRISES

Welcome to Conceptboard, your new tool for visual collaboration!

Aren't you tired of discussing drafts and documents via e-mail? Do you also miss the simplicity of a print out, where you can emphasize your points with marks and scribbles? Think that's gone in the digital century? Think again!

Conceptboard offers a central and secure platform where you can share and discuss documents and project material together with your team. All team members have access to the latest status at any time, even if they are scattered all over the planet. Votes are taken asynchronously on content level, video chat and conference features can be enabled if necessary.

Just use drag-and-drop to upload various formats and arrange the content on your boards. All participants can open and comment the documents independent of installed software; simply in their browsers. This even works on the iPad.

Your benefits are clear: Conceptboard reduces your e-mail traffic, gives you an amazing overview about the work status and speeds up your decision making!

Convinced? Then use the coupon code included here and start collaborating visually right away! And contact me for any questions.

K. Fritzsche
