Overview:

Twins Finder : Like a Antivirus for Attachments

Twins Finder is a utility to find out and defends from storing duplicates attachments based on their data and not by name.

App comes with good looking responsive UI. This application works like an antivirus.

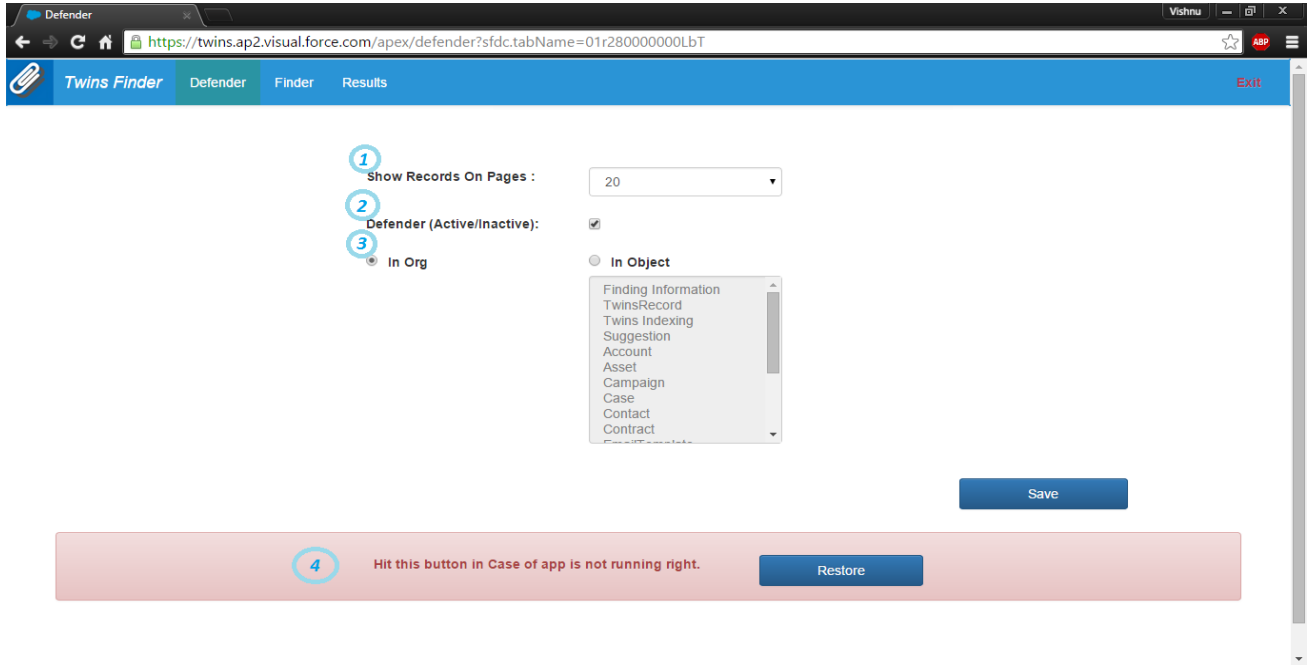

Why do we need “Twins Finder” :

Suppose that we have lots of attachments but many of the attachments are same but names are different, it is hard and time consuming to find out these kinds of attachments manually. Twins finder smartly finds out duplicate attachments based on what is inside them.

About App Configuration:

Basically Twins Finder is having many screens, so we are describing below how the app works and how can user customize it.

- A. **Defender:** This screen is the heart of an app. On this screen, we can customize our app. On this screen we define that app will works as defender or not.

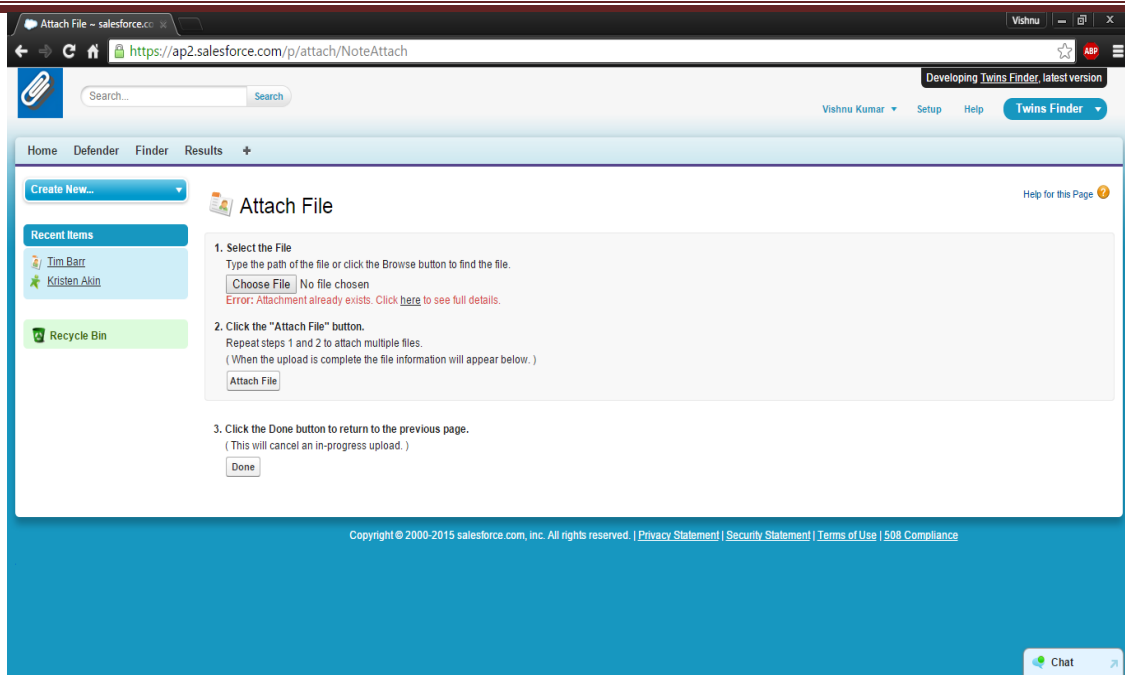

- 1 Show Records on Pages:** Basically it is for pagination on pages. In this picklist user can define how many records will be shown on a page.
- 2 Defender (Active/Inactive):** The checkbox defines whether the defender is active or inactive.

What is Defender: -

Defender is like an antivirus. Defender has an ability to prevent storing duplicate attachments in salesforce.

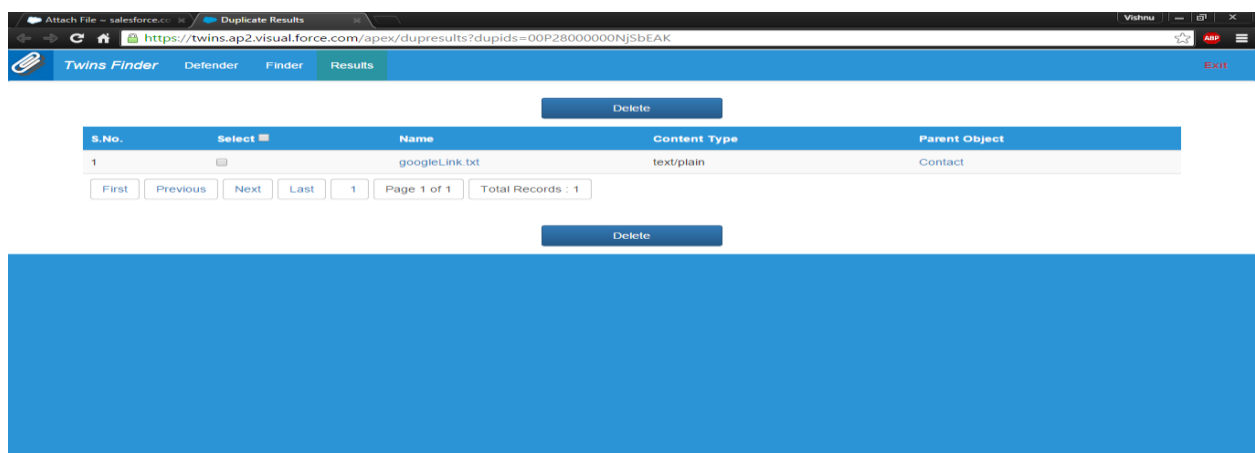

How is it works?

If defender is active, in this case app will not allow duplicates attachment to get stored in the database. If we are inserting duplicate attachments, it will give an error shown in below fig

Clicking on the provided link, we can see the details of duplicate attachments and which records they are belonging to.

The details of duplicate attachments look like fig:

On this screen we can delete attachments as well.

-
- 3 In Org /In Object:** In this section we can define that on which objects the app will provide the defender functionality.

In Org: If In Org is selected then app prevents to store duplicate attachments in all the objects.

In Object: If In Object is selected then app prevents to store duplicate attachments in specified object.

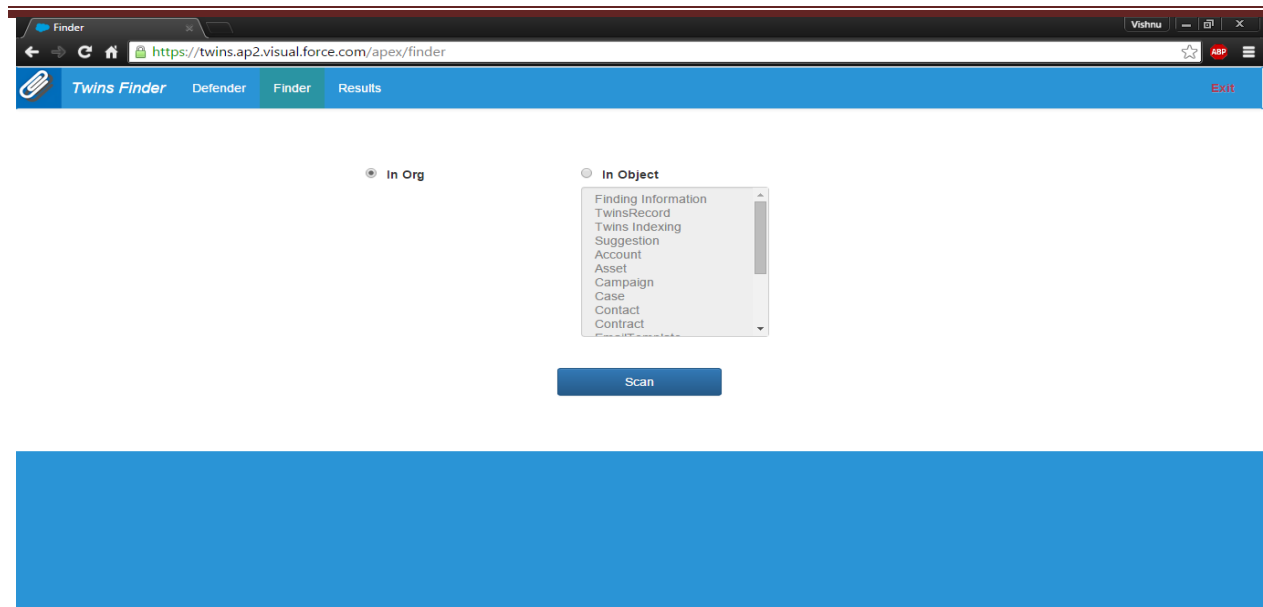

- 4 Restore Button:** It restores the complete app. It will clear all the results and other data.

Note: Please use Restore Button when you think app needs to be restored, because it will take time according to data in your organization.

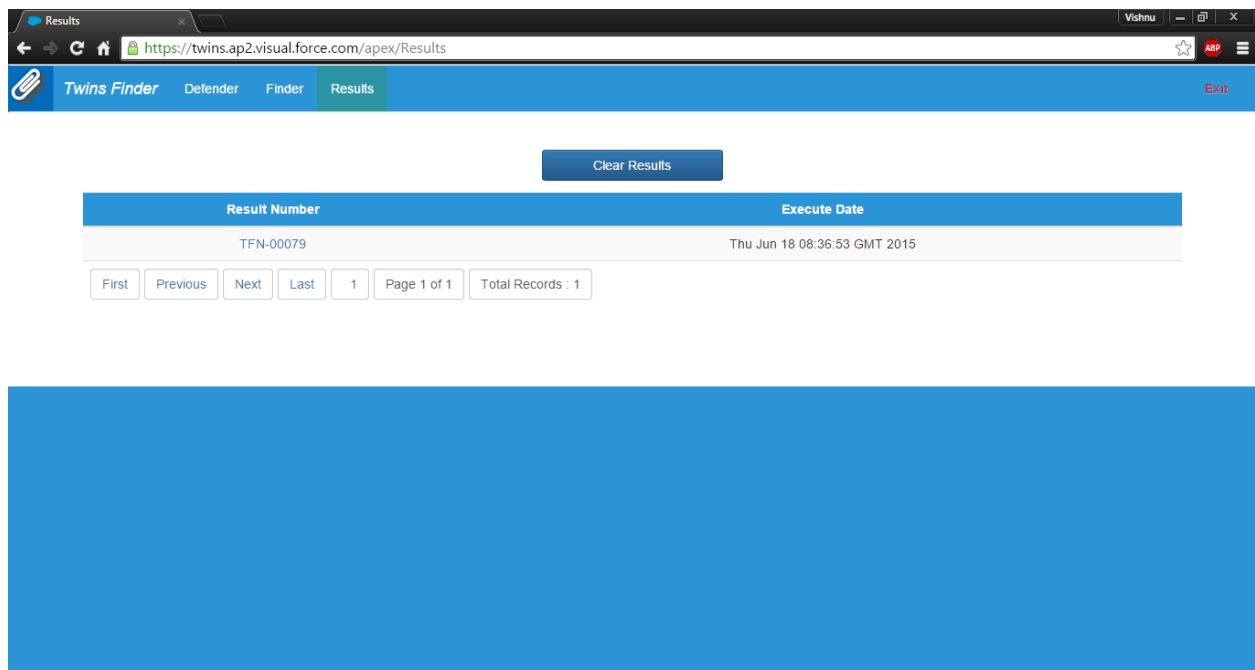

- B. Finder:** This screen allows user to search duplicate attachments according to user selection.

If in org is selected then searching will be in all the objects.

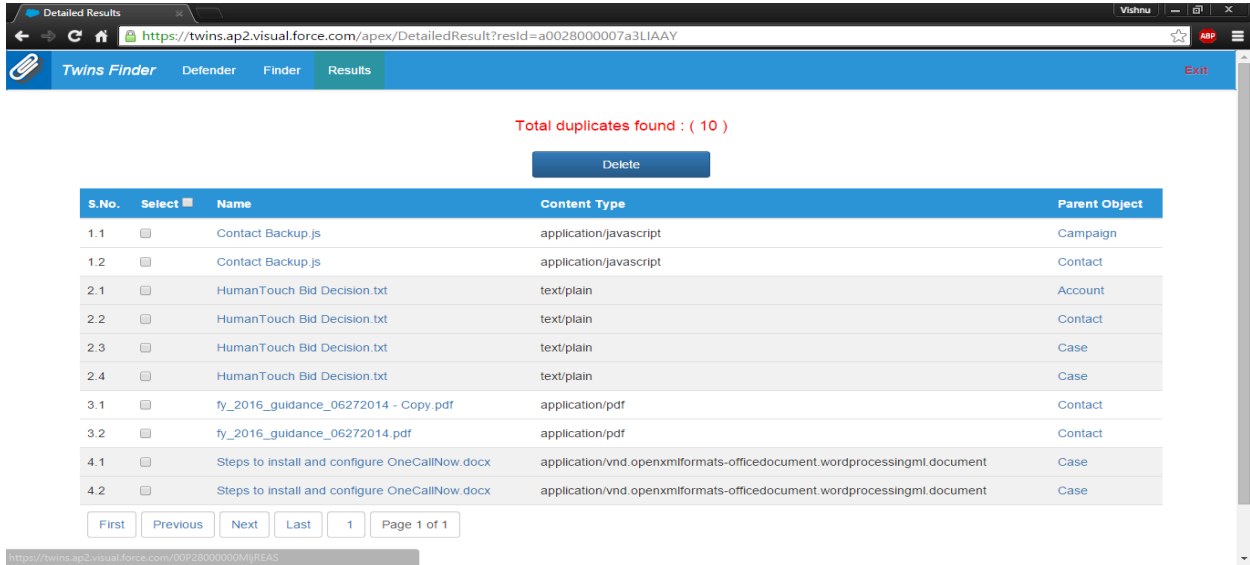

If in Object is selected then searching will be for only specified objects.

- C. **Search Logs:** Whenever user starts a scan then search logs are created. User can see logs whenever they want. User log screen is shown in below fig :

Clicking on these logs user can see all detailed results for the particular log.

The screenshot displays the 'Detailed Results' page of the Twins Finder application. The browser address bar shows the URL: <https://twins.ap2.visual.force.com/apex/DetailedResult?resId=a0028000007a3LIAAY>. The application header includes tabs for 'Twins Finder', 'Defender', 'Finder', and 'Results', with 'Results' currently selected. A red message at the top states 'Total duplicates found : (10)'. Below this is a 'Delete' button. The main content area features a table with the following columns: S.No., Select, Name, Content Type, and Parent Object. The table lists 10 duplicate entries, grouped by their parent object (Campaign, Contact, Account, Case). At the bottom of the table, there are pagination controls: 'First', 'Previous', 'Next', 'Last', '1', and 'Page 1 of 1'.

S.No.	Select	Name	Content Type	Parent Object
1.1	☐	Contact Backup.js	application/javascript	Campaign
1.2	☐	Contact Backup.js	application/javascript	Contact
2.1	☐	HumanTouch Bid Decision.txt	text/plain	Account
2.2	☐	HumanTouch Bid Decision.txt	text/plain	Contact
2.3	☐	HumanTouch Bid Decision.txt	text/plain	Case
2.4	☐	HumanTouch Bid Decision.txt	text/plain	Case
3.1	☐	fy_2016_guidance_06272014 - Copy.pdf	application/pdf	Contact
3.2	☐	fy_2016_guidance_06272014.pdf	application/pdf	Contact
4.1	☐	Steps to install and configure OneCallNow.docx	application/vnd.openxmlformats-officedocument.wordprocessingml.document	Case
4.2	☐	Steps to install and configure OneCallNow.docx	application/vnd.openxmlformats-officedocument.wordprocessingml.document	Case

This screen provides a very simple way to see results. Duplicate attachments are shown here in group. We can also delete attachment easily.

Cheers !!!
