

### CRM SERVICES:

SaaS Solutions offers full-service implementation and ongoing consulting services for clients of salesforce.com, the world leader in on-demand customer relationship management (CRM) applications. SaaS Solutions ensures that clients will take complete advantage of salesforce.com’s best in breed functionality and realize high adoption rates throughout their organization. By offering highly customized salesforce.com consulting, administration, training and continuous improvement services, SaaS Solution’s clients can more effectively manage and focus on expanding their business and competitive edge in the marketplace. We work with clients across industries to understand their business challenges and provide solutions. SaaS Solutions core tenants for success are combining People, Process, and Technology to achieve CRM Success!

### SALES IMPLEMENTATION PACKAGES:

For budgetary reasons, many organizations use their own resources to deploy their enterprise applications. However, they may encounter unexpected challenges: drawn out deployments, solutions that don’t meet business objectives, and limited user acceptance. Our Quick Success Implementation Packages are the perfect option for clients with a limited budget, who are looking to have a successful take off when deploying Salesforce.com. Add-On features and services are available for the packages listed below.
