

Manage enterprise wide visibility to all facilities, equipment and fleet assets with AssetOptics™, a 100% native Force.com maintenance management solution.

Establish calendar- and meter-based preventive maintenance schedules. Manage preventive, corrective and project work orders complete with labor and materials. Manage multi-site inventory with purchase replenishment suggestions using minimum stocking quantities and work order driven demand. Leverage AssetOptics purchase orders for stock item and services purchasing.

## Reduce Unplanned Downtime

Utilize AssetOptics failure tracking codes to identify reasons for asset downtime. Generate Pareto charts for process improvement initiatives. Manage your entire backlog of preventive maintenance, corrective maintenance and project work orders in a single repository. Schedule work when critical assets are available thus reducing the need to remove assets from service for emergency repairs.

## Reduce Repair Parts Inventory Costs

Utilize AssetOptics bills of materials and work order parts planning features to identify repair parts requirements. With fully integrated inventory management and purchasing features, create and release purchase orders so that materials are received just in time.

## Reduce Labor Costs

Quantifying planned labor requirements, synchronizing the repair parts supply chain, and managing technician availability, AssetOptics enables you to get more work accomplished improving labor efficiency and reducing dependencies on outside contractors.

## Increase Return on Net Assets

AssetOptics preventive maintenance extends the useful life of an asset thereby reducing current period depreciation expense enabling you to strategically deploy limited capital resources.

## Support Regulatory Compliance Reporting

AssetOptics inspections, calibrations and repair history tracking enables customer and regulatory agency reporting requirements. Enable record and field level security to further enhance audit trails.

## Reduce IT Support Costs

AssetOptics is 100% native Force.com. Leverage your existing Salesforce CRM expertise to create workflow, reports and dashboards. AssetOptics users do not require an additional Salesforce license – OEM Salesforce Platform license included.

## Mobile

AssetOptics is accessible from your iPhone, iPad, Android Tablet, Blackberry and Windows device via Salesforce1 Mobile.
