

Gain Insight into Your Service and Maintenance Effort with AssetOptics Essentials

AssetOptics' Quick Start Program Gets You Live - QUICK!

Achieving visibility into your assets and their service and maintenance is challenging—if not impossible—without an intelligent, properly designed and structured system as your guide. AssetOptics is just that—a deeply intuitive and user friendly, 100% native Force.com solution for managing your facilities, equipment and fleet and optimizing their maintenance.

AssetOptics was designed by former engineering and software professionals who combined their skills and talents to streamline the complexities of asset and maintenance management through a robust, affordable software platform. Simple navigation, powerful search features and intuitive screens drive user adoption throughout the enterprise and help to maximize asset ROI.

Gaining Visibility to Your Assets and Your Work

Even with AssetOptics straightforward usability and ease of implementation, we find that some organizations need a “quick start” program to dramatically accelerate their roll-out of AssetOptics. To fulfill this desire, we have developed AssetOptics Essentials, a fixed-scope, fixed-price program that delivers, within a two-week timeframe, the implementation and user training assistance you need to begin achieving benefit from AssetOptics in the shortest time possible.

After completion of our expert-developed and led program, you and your team will be reviewing comprehensive asset management, preventive maintenance scheduling and work order

information—delivered straight to your browser, tablet or smartphone. You'll have all the insight and technology support you need to keep service scheduling on track, promote better equipment management and longevity, and make appropriate decisions more quickly, should the need arise.

Program Specifics

AssetOptics Essentials begins with a two-hour kickoff session, during which we review your project scope document, establish a project schedule and discuss your role in the process. From there, we lead your designated team members straight into concise but powerful training sessions on navigating AssetOptics, working with its functions, configuring it for mobile devices and performing other important activities.

We also provision AssetOptics for your organization and then setup and configure key user profiles, user accounts and more. Your implementation comes full circle with a data setup/conversion consultation and a support transition session during which we establish self-service support and review the self-service portal and its processes.

Superior Platform with Flexibility And Control

AssetOptics leverages the power of the world's most popular on-demand platform provider—salesforce.com. It is hosted in salesforce.com data centers around the world, so no company is too big or too small; too remote or too centralized—to use our solution.

AssetOptics Essentials core feature set includes:

- Asset Management
- Preventive Maintenance Scheduling
- Work Order Management
- E-Mail to Work Order
- Insightful Dashboards and Reports

Subscription-based pricing makes the solution affordable for organizations of any size. Our customer organizations retain complete control of how far they extend AssetOptics through their enterprise and how much they scale the implementation up or down. Adding, editing or removing users is always fast and easy.

Derive Tangible Value with AssetOptics

Many companies suffer—for years if not decades—the detrimental effects of inadequate visibility into asset lifecycles and the activities associated with them. With AssetOptics, the suffering can stop, today.

- Gain enterprise-wide visibility into company and customer-owned assets.
- Track asset maintenance costs by work order type.
- Reduce unplanned downtime and maintenance/service labor costs
- Recover warranty claims, thereby reducing maintenance costs.
- Facilitate identification of repair parts through service bills of materials.
- Extend asset life and reduce overall depreciation expense.
- Enhance regulatory compliance reporting.

AssetOptics remains the most user friendly, intuitive EAMS/CMMS (enterprise asset management system/computerized maintenance management system)—on the market. With Essentials to guide you through a powerful quick start effort, we can ramp up your roll-out and improve your vision almost immediately.
