2. Post Installation Steps

Before start using Multi Utility App, you have to perform some post installation steps.

Step : 1 Go to Set Up->Home Page Layouts OR Go to Set-Up and type Home Page on left side search bar, you will navigate to below screen:

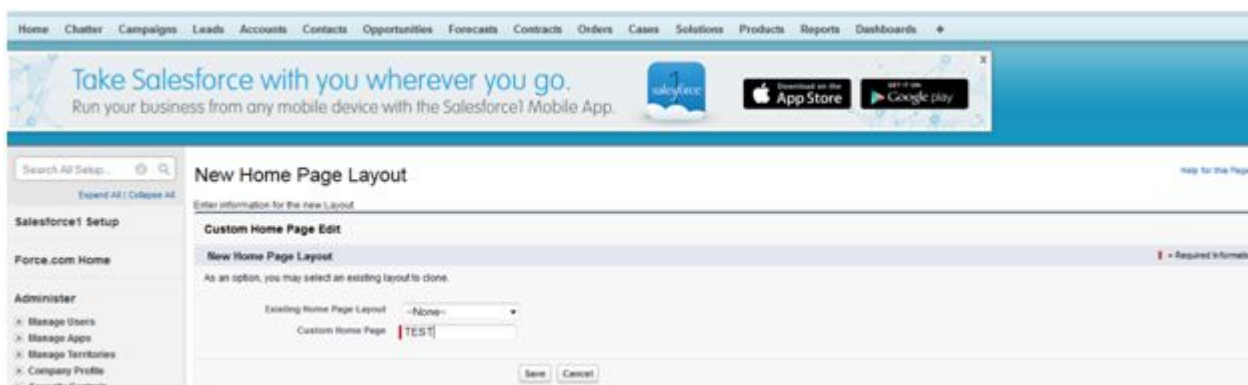

Step : 2 Select Home Page Layout link as shown in above screen and below screen will appear:

Step : 3 Click on “NEW” Button, you will be navigated to below screen:

Step : 4 Type a name for Custom Home Page for eg: “TEST” and then click on “Save” Button.

Step : 5 In the below screen make sure that “Calculator” in the “Select Narrow Components to Show” Section is Checked.

Step : 6 Then select other components as you wish and then click on NEXT button. Here we have just added “Create New” and “Calculator”

Step : 7 Select Save & Assign Button.

Step : 8 Select which all profile you want to show this new Home Page Layout and then Click on Save Button:

Congratulations!!

You have completed the installation and post installation Steps and this app is ready to use. Navigate on any of the tabs to see the App Working!!

For more information on how to use this app, Please go through our user manual guide available on Appexchange.
