

Magic[®] xpi Integration Platform

Your Friendly, Right-Sized Integration Solution

With an increasing number of integration projects on your plate, IT needs an easy and cost-effective solution to successfully execute, maintain and modify them.

Magic xpi is your answer.

Our code-free, visual approach and unrivalled connectivity makes integration fast and trouble-free.

Magic xpi takes care of all of the difficult integration and optimization behind the scenes, so you are free to concentrate on designing the best processes and flows to support your business goals.

Unlimited Ways to Increase Competitiveness

Transform your business by reinventing the way data and processes flow across your CRM, ERP, WMS, SCM, finance, third-party apps and other legacy or cloud-based systems.

Enable mobile workforce solutions by mobilizing and connecting data from core business systems.

Enhance operational efficiency, compliance, and improve data quality by synchronizing master data and automating processes between backend systems.

Empower employees with a 360 degree view of your customers by connecting CRM, ERP, shipping, customer support, social media and more.

Improve e-commerce processes with real-time inventory views and order processing.

Innovate with IoT projects using our new MQTT adapter.

Important Features You Need Without the Overkill You Don't

- **Easy to use**, code-free, drag and drop visual data mapper instead of complex point-to-point coding.
- **Powerful** process automation scheduler with real-time event triggers and automated handling of exceptions and errors.
- **Comprehensive monitoring and management** let you know and manage the health and performance of your system at all times.
- **Unrivaled** connectivity including 100+ prebuilt components, certified and optimized adapters for leading IT systems, and a Connector Builder for everything else.
- **Enterprise-grade**, In-Memory Data Grid (IMDG) architecture with built-in clustering, failover and automatic recovery.
- **End-to-end security** and encryption inside and outside the firewall.
