A FULLY COMPLIANT SOLUTION FOR ANY ENTERPRISE

Increase efficiency

Reduce the signature barrier.
Send documents with a click or two and get them signed while still on the phone.

Decrease cost

Immediate document creation and distribution means you get documents signed in minutes, not hours or days!

Mitigate risk

Increased accuracy reduces 'not in good order' documents. Required workflow rules ensure 100% completion.

Simply integrated. *Securely signed.*

Sign Any Document,
Anywhere,
On Any Device

- Arms-length via email invitation or self-service via web portal integration
- In-person with signing pad, tablet or smartphone

AssureSign is an enterprise-class process automation solution that easily integrates with existing systems and business applications to secure legally binding electronic signatures. AssureSign can be deployed as a "cloud-computing" or Software-as-a-Service (SaaS) application, requiring no hardware or software for any user. AssureSign can also be installed on customer premise.

AssureSign is a service that facilitates the managed processing of documents in an all-digital, high-security environment. Our patented electronic signature software provides forensically identifiable evidence of contractual acceptance with digitized electronic signatures. Signatories can esign by either hand-signing or typing their signature, store and/or transmit documents and contracts electronically. AssureSign is used to quickly obtain biometric or certified electronic signature authorization of documents by one or more signatories located anywhere in the world.
