Services provided

Solutions used

Results

- Improvement of sales processes: standardized, digitized and unified.
- Enhanced internal communication between sales, marketing and support.
- Increase in global collaboration between multiple offices.
- High transparency and analytics across all business sections.

Customer Snapshot

Industry: Hardware

Employees: 25+

Products: Portwell provides both off-the-shelf and versatile custom solutions for apps in the medical equipment, factory automation, retail automation, semiconductor equipment, financial automation, mission critical and security markets for networks.

Portwell's range in products consists of embedded computers, specialty computer platforms, communication appliances, and human-machine interfaces.

"We challenged the team with our need to get a system customized and extended before an exhibition in spring '16. We got a perfect service in consulting, implementation & development as well a training to get our team up and running right in time. After our first step we plan to use the team again to improve productivity even more this fall."

Wolfgang Eisenbarth
Managing Director Portwell Deutschland GmbH

We move your business to the cloud!
