

Install the App

To install the Trial App you need a Salesforce Org with Lightning disabled

If you do not have an Org yet or can't use an existing Org you can use a Salesforce free enterprise test Org with Lightning Experience disabled

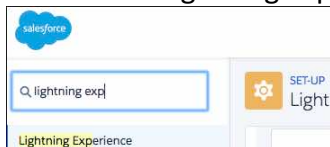

You can download the free Org by following the instructions on the App Exchange.

If lightning is enabled you can disable it in the following way:

- 1) Go to set up (top right of the screen)

- 2) Search for "Lightning Experience" (top left of the screen)

- 3) Click on the yellow marked text "Lightning Experience"
- 4) Scroll to the bottom and disable Lightning Experience with the switch on the right side

If you have an Org to install the App in, follow the instructions on the App Exchange to install the App. Read the "Get started" file to learn how to get the App filled with data to test it realtime.
