

Alpha Publisher & Lightning

Alpha Publisher works in Lightning, but the expected workflow uses certain standard Salesforce functionality that has not been moved to lightning yet:

- Emailing of Quote PDF
Though you can create Quote PDF's in Lightning, there is no facility to email these.
The workaround is to download the PDF and email from your Email client (Outlook or Gmail)
- Pricebooks
Pricebooks work correctly with Opportunities and Products, but there is no facility to edit Pricebooks in Lightning. This is an Admin function, and you will have to revert to Classic to edit the Pricebooks
