

Kimbia Sync for Salesforce

The most flexible fundraising integration for Salesforce.

Complete the donor lifecycle by seamlessly connecting online interactions with constituent management.

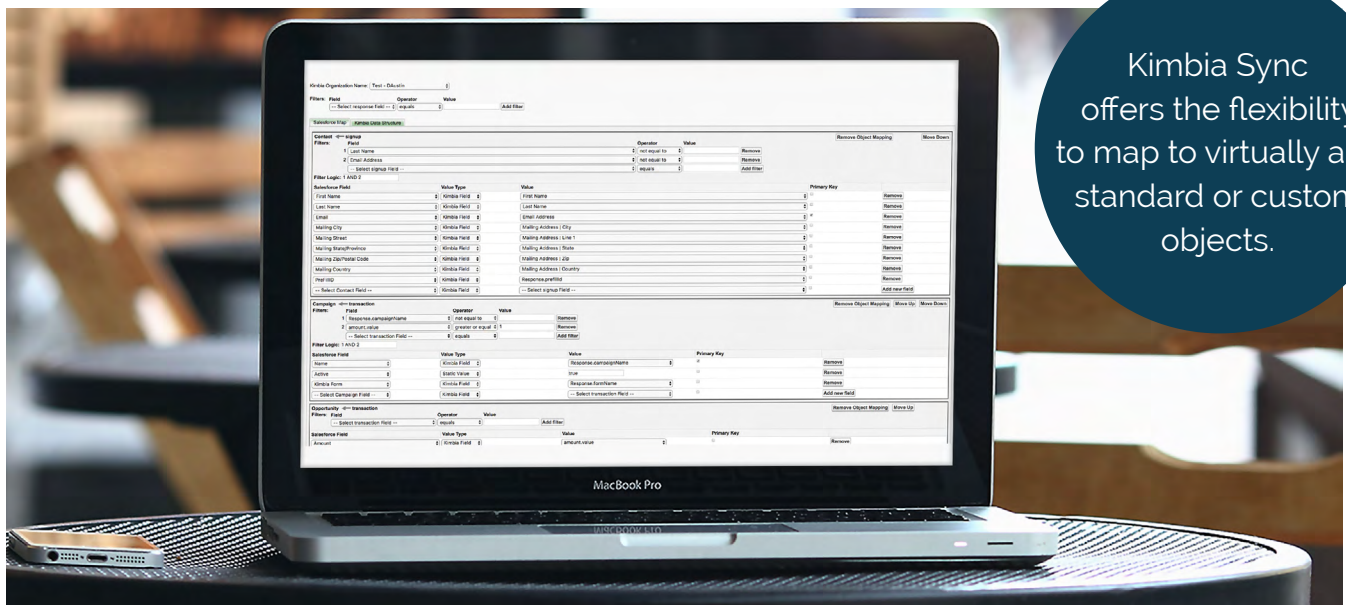

Kimbia Sync for Salesforce works with Nonprofit Success Pack, as well as other Enterprise packages. From one-time & recurring giving to peer-to-peer fundraising, as well as event & volunteer registrations, Kimbia Sync provides limitless mapping options.

Combine Kimbia's powerful online fundraising with Salesforce reporting and dashboards for a centralized view to understand and improve the impact of your campaigns.

Continually adds to data you have building an informed view and complete picture to enable more personalized, targeted messaging and donation options.

Kimbia Sync offers the flexibility to map to virtually any standard or custom objects.

KIMBIA®

Thousands of organizations have chosen Salesforce for its unparalleled power and flexibility. Likewise, thousands of nonprofits have raised over \$1B in donations using Kimbia's online fundraising solutions. Therefore, when it comes to your integration strategy, Kimbia Sync connects your donor's online experience with your ongoing donor relationship management.

Dashboard shows transactions associated with multiple forms. Segment by region, form, cohort group and more. Test a variety of options to optimize your programs.

About Kimbia

An innovator of dynamic, flexible, and easy-to-use online fundraising and event management solutions, Kimbia enables nonprofit organizations to more effectively use the Internet through online donation forms to increase giving, participation and overall support.
