

# Tquila Mobile Solutions for the Aged Care Sector

## LinkageCare Advisory Service

Linkage Care are an aged care advisory service helping families find care solutions so that their loved ones continue to live where they want and on their own terms.

## LinkageCare ... leading the way increases productivity by **250%**

*"When we were completing the assessments on excel, we were only able to do two assessments a day and the Registered Nurses had to have a day of administration to complete their paperwork.*

*The mobile application has now been live for two months and for the month of May...*

*During this time we were able to complete **398 assessments** and take back the administration time... **this has increased our team's productivity by 250%.***

***On average, each nurse completed 79.6 assessments** - which links through to being able to make a recommendation for improvements in the client's home.*

***This month we were able to make 986 recommendations and link through to our provider network to deliver the solutions to our clients.***

*The app along with process builder allows us to do this in an automated fashion where previously it was a manual email scan fax system.*

- Chris Johns, National Sales & Marketing Manager, LinkageCare

At Tquila ANZ, we design, build, and manage Salesforce solutions to support customer needs helping maximise their technology investments and grow their businesses profitably.
