

Empower your business with Financials

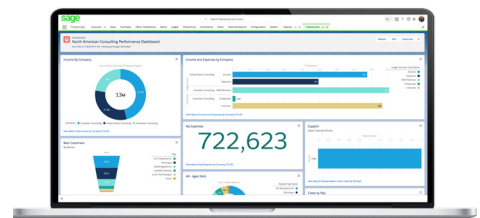

Imagine performing more of your everyday accounting tasks with more automation and flexibility while freeing up time to analyze key data trends, develop powerful insights, and make smarter decisions to accelerate your business.

Financials, part of Sage Business Cloud, is the cloud-based financial management solution for businesses who need powerful accounting, robust analytics and accurate financial reporting to lead, manage and grow their business.

A multi-legislation, multi-currency, easy-to-use platform, Financials enables you to manage multiple locations around the globe—so you can capitalize on growth opportunities as they arise.

- **Gain visibility** into financial and business performance
- **Turn raw data into insights** for a 360-degree view of your customers and business performance
- **Boost automation and productivity** with streamlined workflows and improved collaboration so you have time to focus on what you do best
- **Connect the front and back offices** for collaboration across digital platforms in new and efficient ways
- **Gain the agility and flexibility** that enables you to react to customer demands, competitive pressures, and new opportunities
- **Ensure financial stability** so you can take confidence in cash flow when growth opportunities arise
- **Expand into new markets or geographies** with multi-currency, multi-company and multi-language capabilities
- **Accelerate the quote to cash process** with a solution that integrates with the Salesforce Sales Cloud (™) that your sales teams already use

Time for a change

- Built on the Salesforce cloud platform
- Powerful, predictive analytics (Salesforce Einstein™)
- Multi-dimensional general ledger

- Mobility for Android, iOS, and Windows 10 devices
- Sage Intelligence financial reporting
- Connected ISV ecosystem
- From Sage, the global leader in SMB

"We were looking for something that could streamline financials and feel like part of Salesforce. Financials has absolutely done that."

Patricia McNeela, Head of Operations and Finance, ThinScale

Simplify and streamline financial management

With streamlined workflows and automation, Financials simplifies your core accounting tasks and gives you confidence in the financial health of your business. From accounting and cash flow management to analytics, budgets, and reporting, Financials handles it all with ease.

Create a complete financial picture with dashboards and reports

To keep up with the pace of change in today's economy, you need visibility into all aspects of your business to make real-time, evidence-based decisions. With Financials, you can see all your business transactions in one financial hub, anticipate cash flow, accelerate decision making, and know where to focus your time.

Work on the go

In today's digital world, your workplace is wherever you and your people are in the moment. Financials includes the mobility and flexibility you'd expect from a cloud solution so you can manage your entire business from any connected device. Manage expenses, capture sales invoices, access real-time KPIs and collaborate across teams all from your mobile device.

Partner with Sage

Gain financial certainty, ensure compliance, and know you're on the path to success with a partner you can trust. Financials enables businesses to take confidence in the deep, SMB-focused accounting expertise from Sage with access to a rich ecosystem of business management applications so you can customize your solution to suit your business needs.

"The combination of Salesforce, Financials, and Kimble has given the entire team a 360-degree view of our service delivery, project profitability, and pipeline."

Donal de Paor, CEO, Veltig
