

Badger for Sales Trainers

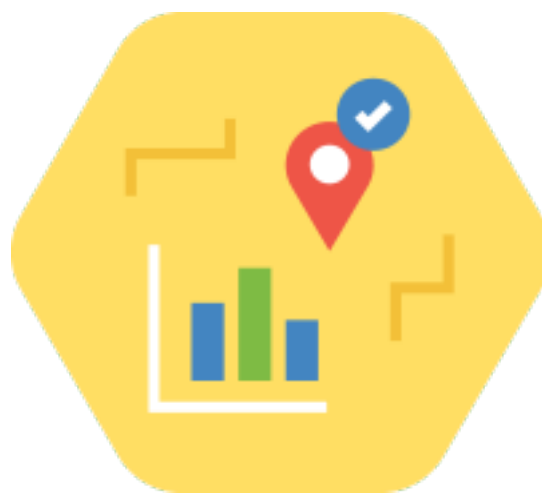

Train your reps on their territory in half the time. Complimentary Badger training gets new hires onboarded faster because it's visual: people can see the territory they're about to run.

Visualize Sales Territory

Visualize accounts in color and filter them by your sales data. See your sales processes in-action and organize Badger's map to show the highest ROI for a sales rep's time. Keep your team organized and on-task by making their sales data actionable.

Track Activity

Badger makes it easy for reps to track their progress. Custom check-ins collect data from sales meetings in-app and generate an activity report for any time period. Organize your sales team's interactions visually and see which reps need support.

Optimize Selling Time

Your reps can create optimized sales routes in seconds without switching apps. An easy-to-use mobile app helps your reps stay engaged and informed when they're in the field. Badger enables your team to focus more on selling and less on busy work.
