

## GET A QUICK START FOR SALESFORCE.COM

### **NeuNet Consultants provides consulting services for Salesforce.com CRM implementations in the Midwest US. We guide your Salesforce Project Team to CRM success at an affordable price.**

As a Silver Cloud Alliance Partner, NeuNet Consultants delivers our services using Salesforce Certified professionals. Our team has over 50 years combined experience in business and high technology sales, marketing, software development, consulting and customer support.

Since we began our Salesforce.com practice in 2007, we have implemented the full range of Salesforce functionality on more than 600 projects.

Our start-up services offering, crmCOACH™, leads clients to early success and self-reliance using Salesforce CRM.

Designed for Enterprise and Professional Editions, crmCOACH gives Project Teams the knowledge and skills they need to manage Salesforce with confidence.

NeuNet Consultants guides the Project Team through Discovery and the basic Configuration, Data Import, Analytics and User Training steps. Reviews are conducted with the Project Team, Executive Stakeholders and during user training.

Through a combination of on-site, teleconference and off-site consulting services, NeuNet prototypes, reviews and refines your CRM performance to meet your business requirements.

We engage within one week of a signed contract and complete typical crmCOACH implementations in 3 to 6 weeks. For established CRM installations, we can review, refresh and re-train your staff or provide targeted services to meet a specific need.

After go-live, NeuNet Consultants remains available to answer questions or provide additional services as your needs and requirements change.
