

ZIP-to-District Matching[®] for SALESFORCE

Match your members, donors and supporters to their federal, state, and local legislative districts in Salesforce.

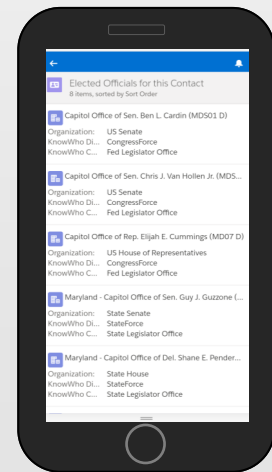

ZDM lets you match your existing contacts and accounts to their legislative districts - match data is kept up-to-date regardless of address changes or redistricting.

ZIP to Districting Matching (ZDM) for Salesforce features and benefits include:

- Accounts and contacts matches can be kept up-to-date for an entire year with no additional costs
- Matched data can be visible on account/contact page layouts and/or on elected official's account record.
- Create campaigns for accounts/contacts located within a specific legislative district.
- Process individual account or contact records in real-time or create filtered batches.
- Subscriptions available for each of the companion KnowWho Salesforce directories — Congress, State, and Local
- Connect with the Action Center Toolkit (ACT) to build grassroots campaigns for specific geographic regions
