Customized Cloud Solutions for the Core of your Business

ReadySpectGO

ReadySpectGO is a mobile cloud-based inspection management solution that enables instant data capture of submitted assignments to create efficient workflows with real-time team collaboration.

Work from anywhere in the field – even in an **OFFLINE** mode – and effortlessly sync all inputs back to the Salesforce platform.

Create unlimited inspection templates using an **easy-to-navigate** wizard that includes numerous different and customizable question types to insert in to your inspection form.

get**READY**

Streamline your interactions by creating custom templates and easily assign agents based on caseload or location

in**SPECT**

Agents report on findings, input data directly from the field to the app, and seamlessly submit inspections

GO

All-in-one mobile technology with online/offline capabilities enables paperless reporting with instant photo capture
