

Kirpal Singh Sachdev

SALESFORCE PRACTITIONER

“We recently went live with the largest ever project Salesforce have done in Asia, with AirAsia. We had a total of 5 consultants from CRMIT on this project, 3 QA resources and 2 developer resources. Despite the challenges, changes and complications with this project, all resources added so much value. I would like to specially mention the QA team, we took the QA lead, onsite for a few weeks and her value was clearly appreciated by AirAsia, and for me who was running the project I had greater control during the testing cycles to make decisions.”
