

Technology Solutions for Healthcare Organizations and the Communities They Serve

J2 Interactive is an award-winning software development and IT consulting firm specializing in customized solutions for health systems, labs, research institutions, and health information exchanges. Our approach is rooted in the fundamental belief that systems succeed or fail based on how well they serve the people who depend upon them. That includes physicians, nurses, technicians, and administrative staff... but ultimately, it means patients and their families.

Consistently at or near the top of the annual KLAS rankings for Technical Services, J2's expertise runs the gamut from technology strategy and best-practices consulting to systems integration, application development, health information exchange, and business intelligence. We are especially well known for our work with the HealthShare® informatics platform and related InterSystems technologies for data management, connectivity and analytics. Since we became an InterSystems Implementation Partner in 2004, **no firm has compiled a longer or more impressive track record of success with InterSystems projects than J2.**

We've assembled a team of more than 130 consultants and engineers in the United States and the United Kingdom, each with many years of experience implementing successful projects of all sizes. We pride ourselves on our personal investment in our clients' goals—particularly in the area of improving patient outcomes—and our commitment to following through until those goals are met.

What We Do

- Systems Integration
- Interface Engine Migration
- Systems Deployment and Support
- Custom Application Development
- Health Information Exchange
- Technology Strategy
- Project Management
- Staff Augmentation
- InterSystems Best Practices
