

What is Yesware?

Yesware is a sales platform for data-driven sales organizations. We help sales teams prospect, connect, and close more deals, right from Gmail or Outlook.

Why more than **800,000** customers choose Yesware

Easy to Roll Out

Yesware seamlessly connects to Google Apps, Outlook, and Salesforce.com to help you run a data-driven, efficient sales process. Installation takes seconds and requires no technical knowledge, allowing your team to stay focused on selling – not learning a new tool.

Salesforce Data You Can Trust

Automatically log activity data on every sales email sent, opened, and received; every attachment downloaded; presentation viewed; and meeting scheduled to the correct Salesforce.com record, all in real time.

Reliable Reporting to Improve Sales Efforts

Slice and dice sales team activity data in Salesforce to analyze lead and contact engagement, or spot red flags in the sales cycle before it's too late. Tie metrics to existing reports and dashboards, or create Yesware specific reports.

Tools to Take Action

Work smarter with email and attachment tracking, email templates, email scheduling, automated outbound emails and drip campaigns built right in your inbox.

“

Yesware has become such an integral part of our sales organization. Every client-facing team has a set of templates and is very comfortable syncing leads/contacts and activities into Salesforce right from their Gmail inbox. Two thumbs way up!”
