

HIPAA COMPLIANT **HEALTHCARE DOCUMENT MANAGEMENT**

//

We were looking for a system where we can store and easily share high quality, fast, reliable and reproducible interpretation of ocular images for research studies. **HIPAA Compliant Healthcare Document Management** Lightning Bolt Solution provided us exactly what we were looking for.

- Partners include Salesforce, MuleSoft, Open Text, Woodwing Software, Fadel, Elvis and Amazon.
- Headquartered in Cincinnati, OH and has a remote office in Eastern Europe.

INGREDIENTS OF HEALTHCARE DOCUMENT MANAGEMENT

Healthcare Document Management gets delivered via HIPAA compliant **S-Drive**, the top document management app on Salesforce and **Lightning Bolt Solution** for **Salesforce Health Cloud**.

Cost effective

Storing documents in Salesforce is a costly proposition. S-Drive helps reduce costs when it comes to file storage and management.

Customizable

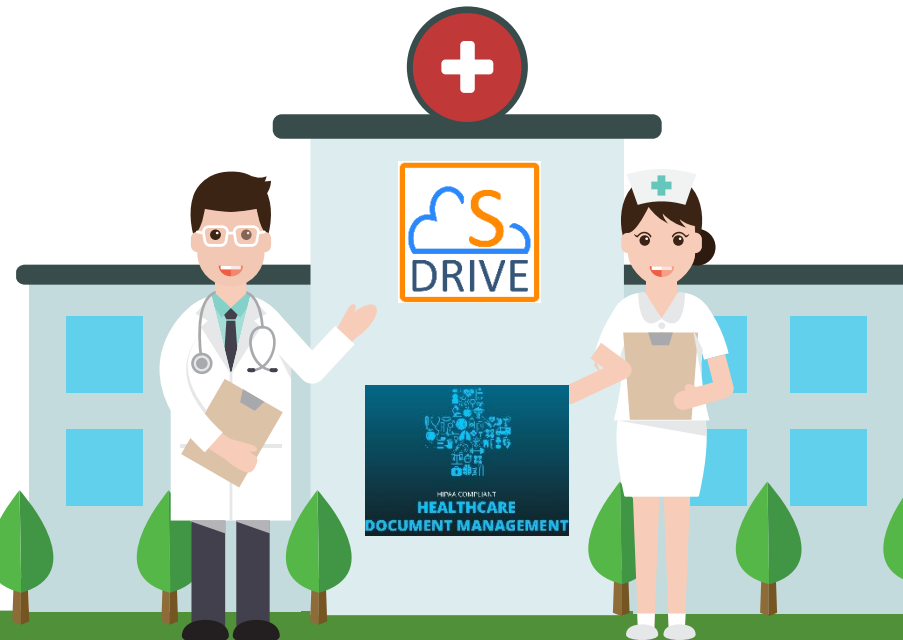

Neither Salesforce nor other Salesforce apps have APIs that can help you sync with Salesforce attachments or bring files from different platforms into Amazon S3. S-Drive helps you overcome these challenges.

Flexible

It is difficult to commit to enterprise software since you might make annual investments. S-Drive has a pay-as-you-go model where you can cancel anytime and move on!

Scalable

In Salesforce, it is easy to hit governing limits while uploading, migrating or even emailing files. S-Drive allows upload and migrate large files (up to 5TB). Emailing is a breeze since S-Drive helps you send URLs of files as emails.

USE CASES OF HEALTHCARE DOCUMENT MANAGEMENT

HOSPITAL DOCUMENT SYSTEM

Lab reports to **Staff files**, all documents can be safely stored in one central location

CARE PLAN FILE MANAGEMENT

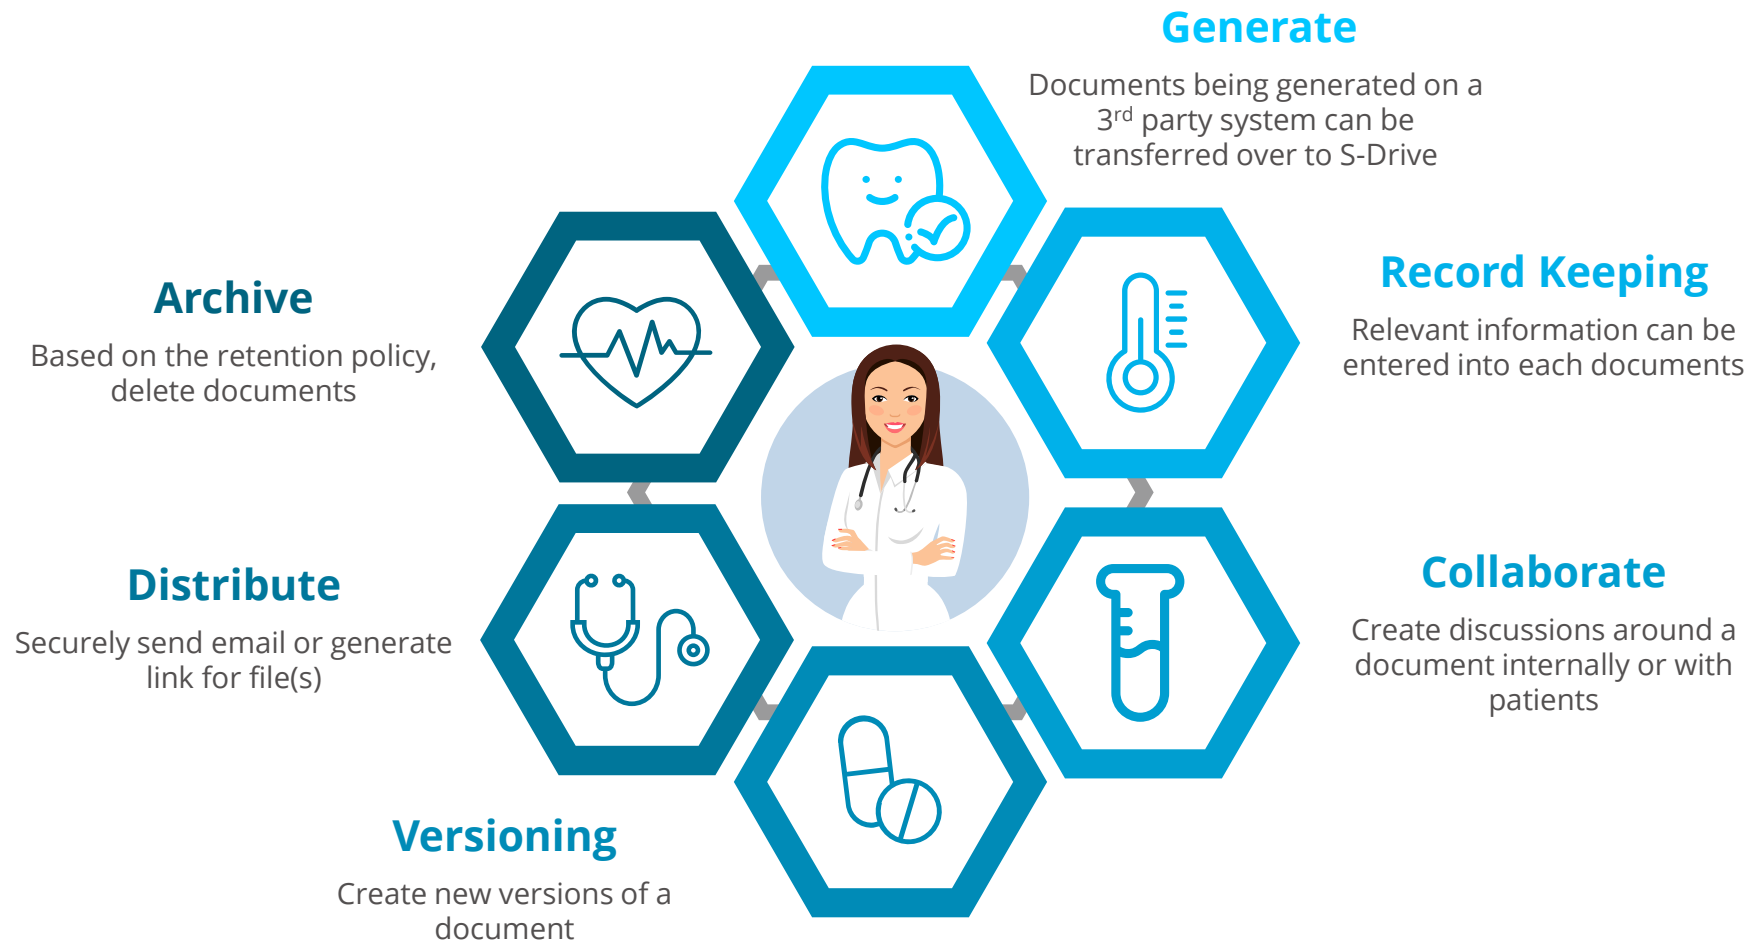

Care plans require file exchange between care plan agent and patient. Regardless of size or type, any file can be shared

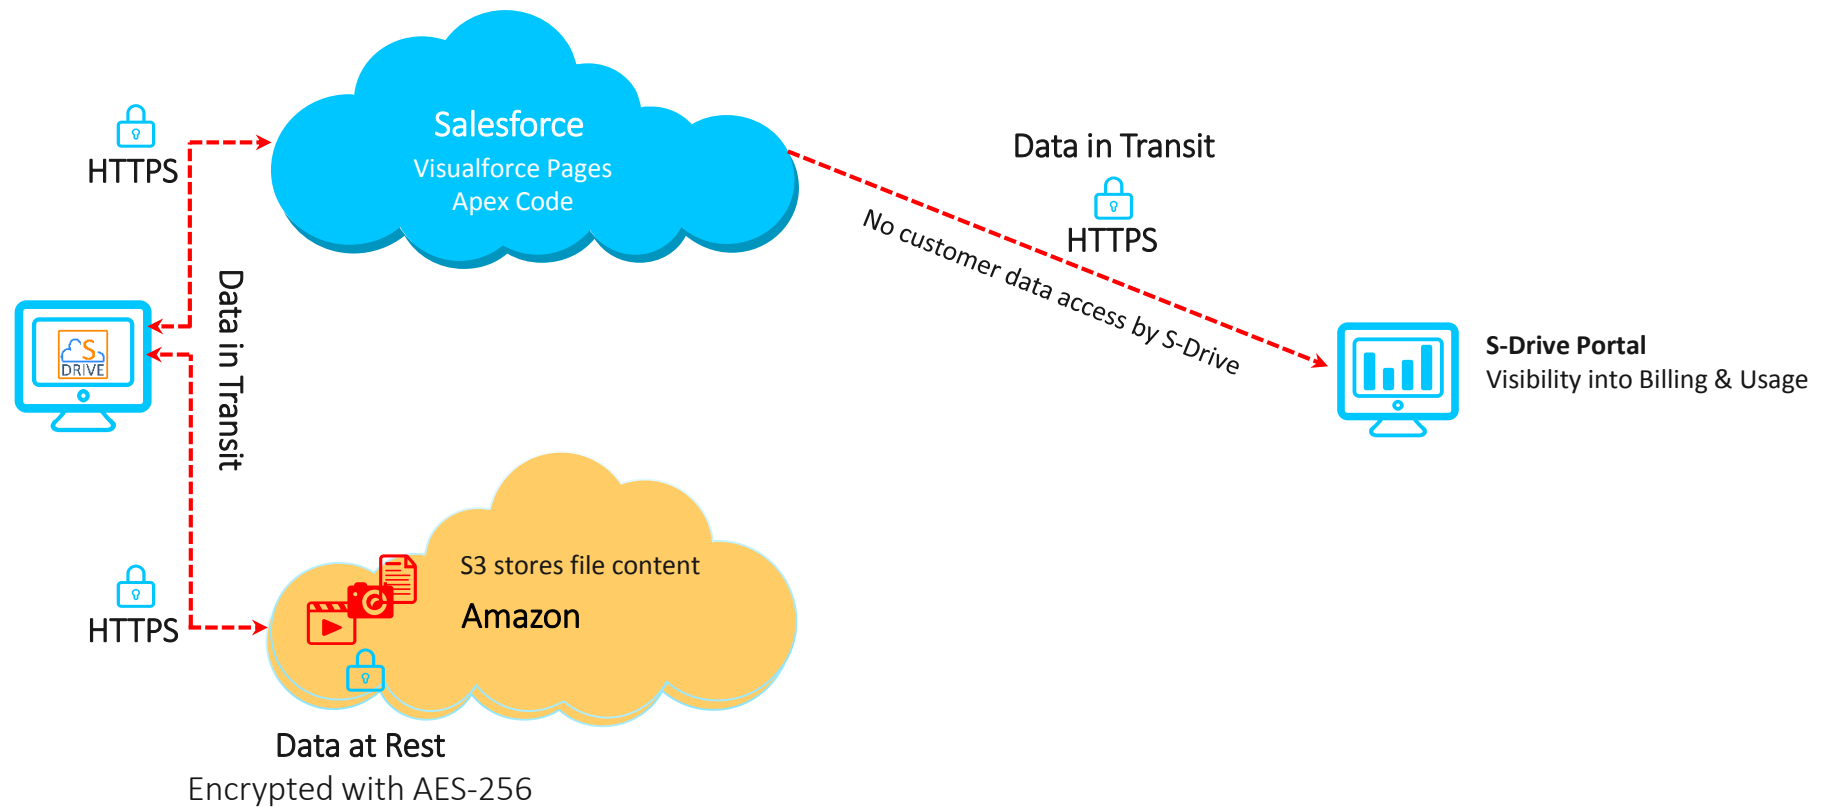

ELECTRONIC HEALTH RECORD DOCUMENTS

Any supporting document that will support **electronic health record (EHR)** can be retained and get easily accessed.

LIFECYCLE OF HEALTHCARE DOCUMENT MANAGEMENT

ARCHITECTURE

FEATURES OF HEALTHCARE DOCUMENT MANAGEMENT
