

Grow your list with SFMC-integrated forms and widgets

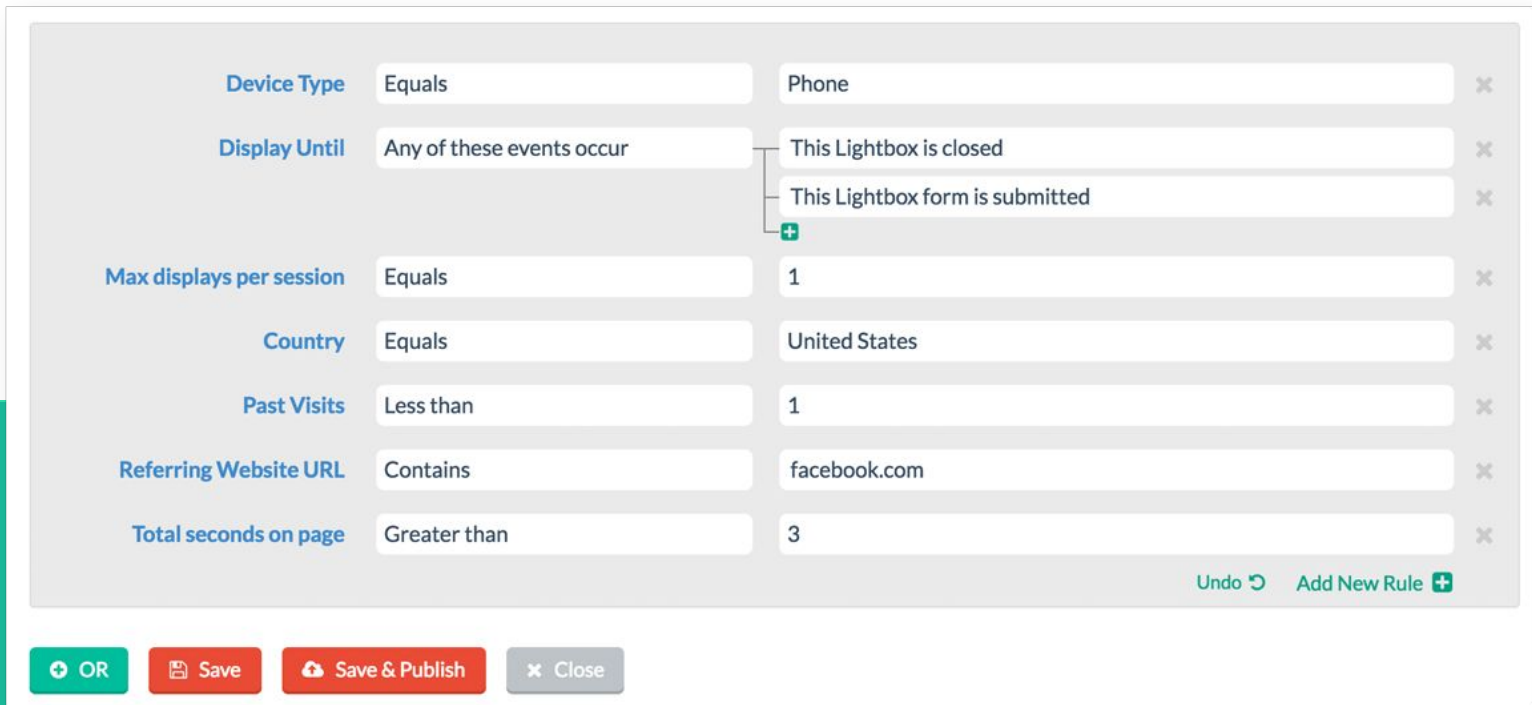

Drag and drop to create custom forms

Our library of 100+ themes: your shortcut to great design

Control when & where your forms are displayed

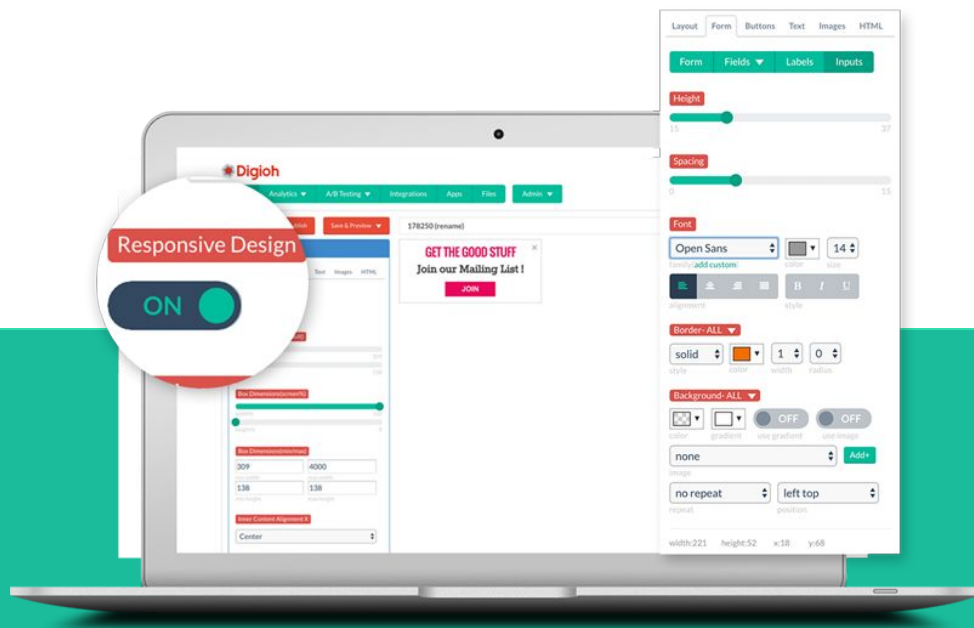

The screenshot shows a configuration interface for controlling form display. It features a list of rules, each with a label, a comparison operator, and a value. The rules are: Device Type (Equals, Phone), Display Until (Any of these events occur, with a list of events: This Lightbox is closed, This Lightbox form is submitted, and a plus icon for adding more), Max displays per session (Equals, 1), Country (Equals, United States), Past Visits (Less than, 1), Referring Website URL (Contains, facebook.com), and Total seconds on page (Greater than, 3). Each rule has a close button (X) on the right. At the bottom right, there are 'Undo' and 'Add New Rule' buttons. At the bottom left, there are four buttons: 'OR' (with a plus icon), 'Save' (with a floppy disk icon), 'Save & Publish' (with a cloud icon), and 'Close' (with an X icon).

Device Type	Equals	Phone	X
Display Until	Any of these events occur	This Lightbox is closed	X
		This Lightbox form is submitted	X
		+ (Add New Event)	
Max displays per session	Equals	1	X
Country	Equals	United States	X
Past Visits	Less than	1	X
Referring Website URL	Contains	facebook.com	X
Total seconds on page	Greater than	3	X
