INDUSTRY SPECIFIC

SPEED UP YOUR SUCCESS

We've created a range of BrightGen business accelerators, built on Salesforce. They allow your businesses to perform specific functions more easily, such as booking advertising space, facilities management, employee case management and customer communication.

Because these solutions are pre-developed by BrightGen and ready to implement, we can get them set up and working with Salesforce quickly, so you get fast results. Perhaps the best part is that they're tried and tested – having already proven effective for many of our customers. By choosing a BrightGen accelerator we spend less time duplicating work while you get reliable solutions that speed up your progress and enhance the way you work with the Cloud.
