

Customer Reference: Siemens

Inspection of high value assets

COMPANY OVERVIEW

Siemens Gamesa Renewable Energy is a global technological leader in the wind industry with an installed base of 75 GW worldwide, a reach in over 90 countries and a team of more than 27,000 professionals. With a presence spanning the entire value chain, the company designs, manufactures, installs, commissions, operates and maintains onshore and offshore wind turbines across the world.

COMPANY PROFILE

LOCATION	Beersel (Huizingen), Belgium and Zoetermeer, The Netherlands
EMPLOYEES	27,000
INDUSTRY	Wind Power
COMPETITOR	None / Unknown
SOLUTION(S)	Salesforce Platform & Inspection Tracker
GO LIVE DATE:	14/12/2015

CHALLENGE

- Periodic inspection for lifting equipment
- Periodic inspection for calibration equipment
- Registration of technician bags
- Grouping of assets and combined inspections
- Inspection result reporting
- Registration Certification and certification holders

SOLUTION

- Implementation of Inspection Tracker for Salesforce

RESULTS

- Complete asset registration & inspection log
- Accurate registration of assets & Employee safety
- Compliant to Regulations

Certificate

Advanced Rescue Zone 1-2
SEP-00001

GDR no. Company: 201056488 Siemens Energy, Inc. Name: Thomas Peers

Completion: 22 March 2013

expiry: 22 March 2014

Users in any valid setting as the certificate holder has access to updated

What our customers are saying:

GROWTEQ

Great app for professional inspections

Inspection Tracker has enabled our team to streamline and automate our inspection processes and dramatically increased efficiency and productivity.

Our old process required us to manually keep an asset list in excel up-to-date, making the process prone to error and lacking a clear history overview of our assets (inspections, comments, repairs,...).

With the Inspection Tracker application, we now have a uniform inspection and registration process across multiple locations. It allows us to reduce steps and enables field workers to spend more time on what matters. They can effectively complete inspections in compliance with our high standards and capture important inspection information through images and comments.

In Growteq we found a developer that reacts quickly to our users' questions and is always open for feedback to further improve upon their app.

Stef Lauwers, Operations Manager Service Onshore at Siemens Gamesa Renewable Energy
