

Why eCourier?

Reports are an integral part of any Data Management application. Every marketing strategy, customer management plan is based on analysis of reports.

Using eCourier, you can share, analyze and review all your standard/custom reports via email.

This application gives you the flexibility to choose external email addresses as well, which frees you from all the IP restrictions that your Salesforce org might have, as you can get all the reports you require

Create schedule

Select any standard or custom reports in your Salesforce org and send it to multiple recipients at any chosen interval. eCourier can send these reports to recipients outside your Salesforce org as well.

Choose Recipients

This application allows user to choose up to 100 recipients from any of the users and contacts available in their Salesforce org along with recipients who are not a part of their Salesforce org.

Choose email content

User can specify their own subject and email body for the mails that will go out with the reports.

Edit, Enable/Disable and Delete

The schedulers, once created, can be viewed, edited and enabled or disabled as required.
