

Join the document generation revolution today

With Weaver, you can easily design beautiful templates, weave documents on the fly, and fully automate your document and email workflow, all built on the power of the Salesforce platform.

With clicks not code, and our example templates to get you started, moving your document generation process over to Weaver becomes quick and easy, you'll be automating your documents and emails in no time.

"Weaver has made our document creation and generation processes easier, quicker, and more efficient"

Robert McLean

Communications Manager at BSS

Read on to learn how Weaver can change your business

What can Weaver do for you

Design & Manage

- Design bespoke templates with our on-platform drag & drop document builder
- No need for third-party word processors or online document storage
- Pull in data and reports directly from your Salesforce instance into your rendered documents
- Integrates with any document signing tool of your choice

Re-use & Maintain

- Create reusable components that can be used across all your templates
- Dynamically render document content based on Salesforce data
- All on-platform - your data doesn't leave your Salesforce instance
- Version control all your templates and components
- Import and export templates across Salesforce instances

Generate & Automate

- Fully extendable - add Weaver to your Flows, Process Builder, and even custom Apex
- All features available in both Salesforce Lightning or Classic
- Automate document and email template generation using your designs
- Ability to export templates to PDF, DOC, and HTML formats

About Appitek

We build innovative solutions for business, using the best of modern capabilities and technologies, all built on the power of Salesforce.

Our aim is to help make your job easier, by creating simple but powerful Salesforce applications that make you more efficient at what you do. We believe that by creating a better experience through our products and tools, we can help not only help improve your business processes, but your own personal process, helping you save time on long drawn out processes, and focus more on your customers.

With Salesforce as a central technology in our applications, you can be sure that our solutions are stable, scalable, and safe.
