

Manage your patient data end-to-end seamlessly

An assessment of 1752 practicing family physicians found that 44.6% (782) believed they spend an excessive or moderately high amount of time working on EMRs at home.

Source: *Health Informatics*

Elixir built on Salesforce Health Cloud brings you EMR & Census capabilities that can save you a lot of time and effort in keeping your patient's record up-to-date smoothly.

+ ***Census integrated with Patient Intake Process***

Elixir is built to help you right from the start of the sales process i.e. when the patient is yet a lead in the system. The automated processes helps you in conversion cycle of the lead to a patient, the Verification of Benefits, the Pre-Assessments & Bed Allocation. Census module (Heat map & Weekly Reports) allows the admin & sales team to get a clear picture of the available beds to plan accordingly and take actions in advance.

+ ***Extremely Handy***

Whether it is the Care Practitioner, members of the Care team, Care-coordinator, Utility Review team, medical coder or the claim generation team, Elixir has got it all covered. Elixir ensures easy access to the required information from a single screen. Just point and click!

+ ***E-Prescriptions***

Elixir makes everyone's life easy by using *Surescripts* e-prescriptions, drastically reducing the chances of errors and improving monitoring & adherence to medication.

+ ***Inventory Management***

We have even thought about your pain in managing Patient's belongings. Easy process of maintaining, tracking and releasing the Inventory.

+ ***Medical Billing***

Reducing the headache of hospitals, Elixir makes use of *CollaborateMD* for end to end billing solutions. Operators can access updated claims information right from the Elixir platform and won't have to surf between different platforms.

+ ***Medical Coding***

We are dedicated towards making the life of Hospitals simpler. Taking a step in that direction, Elixir has an inbuilt medical coding process, an easy to access screen where the Medical coder can code, review and verify the medical codes.

+ ***Discharge & Alumni Management***

Using Elixir's automated flows one can easily manage Patient discharges and the Alumni Patient communications.
