

Customer Relationship Management

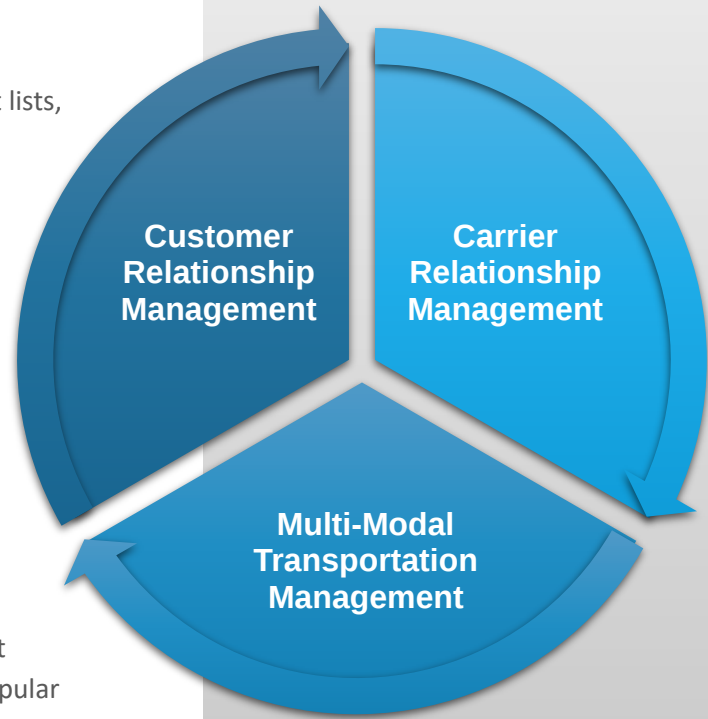

Find, close and collect revenue more effectively! Manage prospect lists, sales and marketing activities, email campaigns, real-time freight quotes, invoice generation and collections activities! Deploy branded web communities for real-time customer engagement.

Carrier Relationship Management

Identify, evaluate, on-board and pay carriers quickly. Automatically monitor compliance with Federal motor carrier regulations and internal performance standards. Deploy branded web communities for real-time carrier engagement.

Multi-Modal Transportation Management

Plan, price, optimize, book, tender, track and trace loads across carriers and modes. Automatically spot rate shop or apply contract rates, audit freight bills, manage claims and exchange data with popular accounting and warehouse management systems.

"Improve sales velocity and provide better service at lower costs!"

RevenovaTMS empowers manufacturers, distributors, transportation brokers and 3PLs to align customers, carriers and co-workers on a common platform designed for customizable workflow and approval processes, real-time collaboration, and dynamic reporting capabilities. Strategically share information across your organization and with your customer and carrier communities to improve service delivery and customer satisfaction. Support the quote-to-cash cycle of modern day freight brokering and logistics management without the time, cost and hassle of integrating multiple vendor platforms and products.

Rely on the World's #1 Cloud Platform and Ecosystem

RevenovaTMS is the first and only multi-modal TMS solution certified on the salesforce platform and available in the AppExchange marketplace. Your company benefits from the most secure, reliable and open cloud in the market used by thousands of customers, supported by thousands of consultants and compatible with thousands of third-party applications. No other TMS provider can match the vendor ecosystem and cloud infrastructure of Revenova.

5 Star Rated
