
The New Standard for SAP Integration

enosix provides an **SAP-certified integration platform** that uses a patent-pending communication protocol and framework of purpose-built advanced ABAP objects.

Once installed at the SAP ERP app layer, enosix provides real-time, bi-directional access to SAP data natively within today's modern, front-end systems of engagement.

Scalable, Reusable and Future-proof

The enosix framework surfaces master data across your entire enterprise to better serve your buyers and customers.

- **Real-time:** Interact with customers and make decisions using real-time, up-to-date information
- **Bi-directional:** Read, create, and update SAP data directly from your front-end system of engagement
- **SAP ECC and S/4HANA certified**
- **Virtualize or synchronize data** re-using the same humanized & extendable models and framework
- **No middleware required**
- Prepackaged set of **ABAP Process Integration Flows**
- **Presentation integration:** surface SAP data in your front-end system of engagement natively and dynamically
- Connect to **any front-end system of engagement** to SAP including Salesforce, SAP C/4HANA, ServiceMax, Microsoft, etc.
- A simple lift and shift for your **ECC cloud integrations to S/4HANA**

You're in Good Company

"enosix accelerated our implementation plan by nine months."

Katrina Agusti | VP, Solutions Delivery IT, Carhartt

Equip your customer-facing employees with the information they need when they need it, reduce the costs of IT maintenance and implementation, and accelerate your time to value.

By integrating your front-end system of engagement with SAP ERP through enosix, you will:

- Lower upfront build effort and timeline:
 - Read-only: 1 to 2 weeks
 - Bi-directional: 1 to 2 months
 - Complex custom transactions like Variant Configuration: 2 to 3 months
- Mitigate risk and encapsulate:
 - SAP Governed Rule Set
 - Process Orchestration
 - Authorization, Authentication, Auditing & Permissions
 - SAP Terms Translation
 - Full CRUD Capability
- Purpose-built and standardized: transform and deliver a customer experience at the speed your customer expects.
