

Want your reps to make more and better phone calls?

Then reduce the amount of work that it takes to make them and log them. The Ring.io Power Dialer for Salesforce turbo-boosts your team's calling efforts by empowering reps to dial lists of leads, accounts, opportunities and contacts right from Salesforce Lightning or Classic, and by automating the process of logging detailed call data, such as call recordings, notes, dispositions and follow-up tasks.

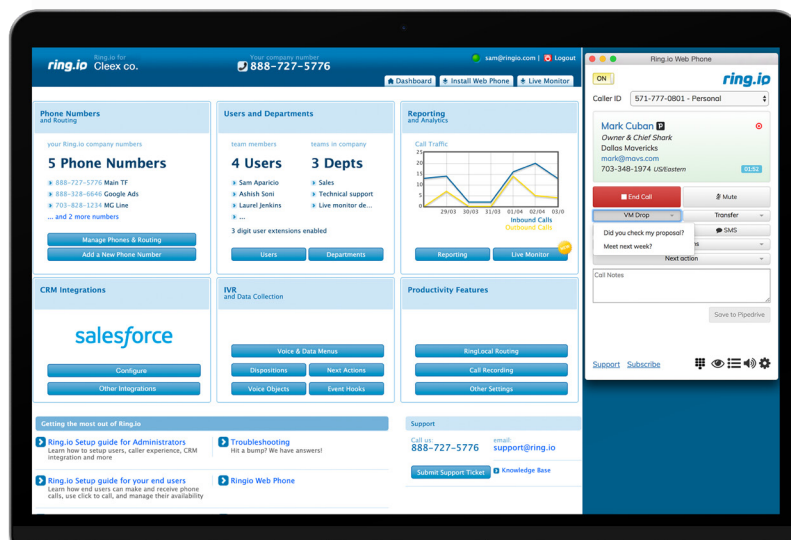

Better sales performance starts with better data, and once you start using Ring.io's call center solution for Salesforce all the important patterns will start to emerge. With our integrated analytics and live monitoring tools, understanding what the top performing reps do and replicating it with other reps becomes a snap. Transform your coaching and 1:1 meetings from a dry 20 minutes to a lively and engaged conversation about how to really get better.

Powerful Features

- List-based auto-progressing power dialer and click to call modes
- Works with just a computer and a headset, or with IP phones, or cell phones
- Get phone numbers from us or use your existing phone numbers
- Automatic Voicemail Drop leaves pre-recorded voice messages
- Matches people you call or who call you to any standard or custom Salesforce object
- Logs calls and all associated metadata to Salesforce as activities (or something else if you prefer)
- Live Monitor helps you track calling activities in real time, including call goals for the day
- Eavesdrop on rep calls and even join with just 1 click
- Advanced Reporting and Analytics available both out of the box and inside of Salesforce

Extend
Salesforce with
a simple,
integrated
power dialer
