Rolling Trademarks

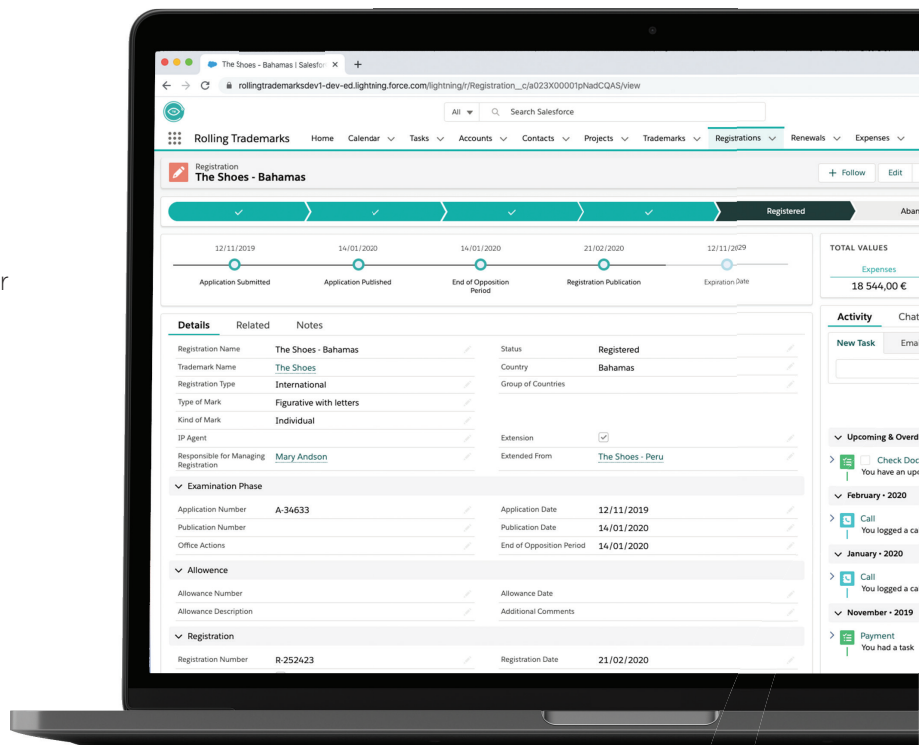

is a complete cloud solution that allows an easy and efficient management of all the main routines related to the registration of a national, european or international trademark.

Since it can be fully adapted to the needs of your business, it allows you to automate the main tasks that take up your time and dedicate yourself to the tasks that really deliver value to your company.

Save time on administrative tasks and reduce paper waste in processes.

Main Features

- Intuitive, easy to use and customizable interface
- Native application for mobile devices (iOS and Android)
- Control of trademark registration processes with timeline and automated tasks
- Easy management of requests, expenses and documents
- Simple management of renewal rules in all countries
- Coexistence and Assignment Agreements, Oppositions and Proofs of Use
- Easy-to-use calendar management with alerts
- Google and Outlook integration
- Tailor-made workflows and approval processes

Automation

Prevents missed deadlines and forgotten details with custom email alerts and automated processes.

Collaboration

It provides an internal "social network" that provides easier and faster internal communication.

Monitoring

Applications and expenses management and monitoring, simplifying the most recurring tasks.

Security

Developed under Salesforce Platform™, the world's leading CRM, holding extensive security and privacy certifications.

GDPR Ready

Ready to implement GDPR processes. Hosted on servers in Europe. Data encrypted client - server.

Analysis

Overview of all trademarks registrations through easy and intuitive reports and dashboards.
