

INFOSYS AGILE PLANNER

One-stop shop for Agile Planning, Release Management and Project management

With the snowballing pace of software implementations, competitive needs of early go-to-market and de-risking of large implementations, agile-centric implementation methodologies are catching up pace and power. To aid the speed of these agile implementations, enterprises are embracing agile software building platforms that help design, plan and execute agile programs as well monitor the program or portfolio health. What next?

Clearly, there is a need for not just a monolithic agile platform but a tool that brings in operational excellence in managing the planning phases of the program, reduces cost of maintaining program data in discreet systems, delivers a rich UX for the users to be encouraged to use the solution.

Get ready to explore a SMART solution

Infosys Agile Planner, a Salesforce based next generation agile software building platform brings in all the essential components required for Agile planning, Project Management, Quality Assurance, and People Management with the following feature set -

- **Project and Release Planner** - Manage project, release planning and execution
- **Backlog Manager** - Manage product backlog, ranking/ priority-based backlog planning
- **Sprint Runner** - Sprint planning and management, manage user stories and associated workstack
- **People Viewer** - Manage people/ teams with their enablement status
- **Quality Assurance** - E2E test management, defect management, traceability reports
- **Project Visuals** - Kanban board view across sprints, backlog, user stories etc. for better decision and action management
- **Collaboration** - Guided chatbot, workflow enabled alerts and notifications
- **Agile Analytics** - Project progress snapshot, QA progress snapshot, test traceability, burn down charts, sprint velocity etc.
