

## Simple User Guide

Once you have installed the Simple Gauge component from the Salesforce [AppExchange](#), it become available in all the Lightning Record Pages as **Custom – Managed** component

Drag and drop the component to add it to the record page

Configure the component :

- Set the component title
- Set the percent field
- Customize the range limits
  - Range 1 : from 0 to the value defined in Limit 1
  - Range 2 : from value of Limit 1 to the value defined in Limit 2
  - Range 3 : from value of Limit 2 to 100
- Customize the range colors

The screenshot shows the Lightning App Builder interface for an Opportunity Record Page. The 'Simple Gauge' component is being configured. The configuration panel on the right includes the following settings:

- Title:** Opportunity Probability
- Field API Name:** Probability
- Limit 1:** 33
- Limit 2:** 66
- Gauge color (0 to Limit 1):** red
- Gauge color (Limit 1 to Limit 2):** yellow

The main preview area shows the 'Simple Gauge' component displaying 70% completion, with a green arc representing the progress. The component is titled 'Opportunity Probability'.
