

Ascent Inventory Management (IM): Control Inventory with Ease

Ascent Inventory Management is the hub of a many spoke system for an organization striving for a 360 degree view of its operations. Ideal for companies with a strategic desire to assemble best-in-class Salesforce applications to dramatically improve operations, revenue, and customer satisfaction across lines of business.

Ascent Inventory Management extends the value of Salesforce for purchasing, accounting/finance, sales, and warehouse teams. For products, Ascent IM extends the Salesforce product object adding fields and functions to assist in tracking inventory and costing data.

Inventory Control

Efficiently manage inventory in multiple warehouses, for serialized or non-serialized products, receiving to or moving to a location or specific lot, while capturing critical attributes on each transaction such as cost.

Manage Products

Update products, price books, units of measure or view transaction histories to more effectively manage the lifecycle of a product or service.

Gain Serial and Lot Visibility

Monitor inventory by serial, lot and expiration date to closely manage perishable products with ease such as medical supplies and food or higher stakes industry inventory for airlines, oil, and energy. Movement from location to location does not create new lots so lifetime traceability is available.

Returns to Vendor

Create and process returns to vendors when defective or poor quality products are received.

Financial Insights

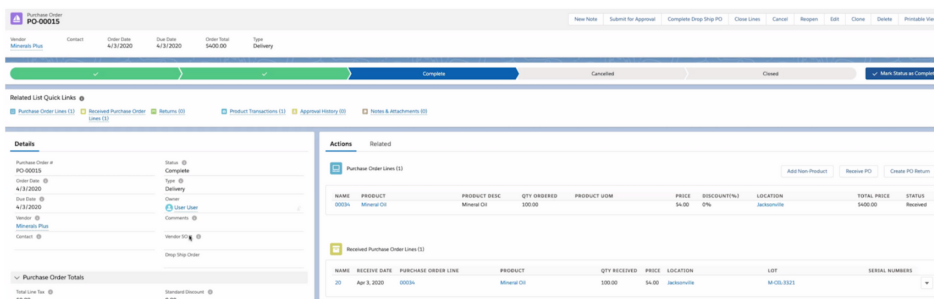

Record and review costing types (AVG, STD, LOT, ASSET), costing models (FIFO, LIFO, and FEFO), and product transaction histories.

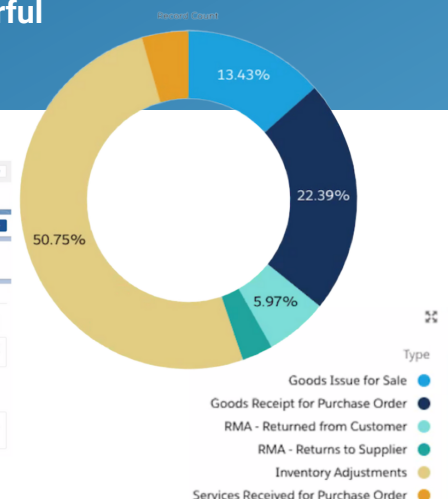

Purchase Orders

Create purchase orders to meet stock levels or the need for products to meet demand. Select the right supplier based on price and product availability. Receive to specific locations and lots to automatically adjust inventory.

Seamlessly manage the purchase order (PO) process & powerful insights into suppliers, vendors, and warehouse fulfillment.

NAME	RECEIVE DATE	PURCHASE ORDER LINE	PRODUCT	QTY RECEIVED	PRICE	LOCATION	LOT	SERIAL NUMBERS
20	Apr 3, 2020	00015	Mineral Oil	100.00	\$4.00	Jacksonville	W-021021	

Benefits

Affordable

With pricing starting at \$50/user/month, Ascent IM means you don't need to break the bank for a powerful inventory management application.

Increase Visibility

Service customers more effectively with deeper insights into inventory, costs, vendors and fulfillment from the warehouse to the field.

Extend Sales Cloud, Service Cloud, & Field Service Lightning

Extend Salesforce functionality with real time inventory management features that empower purchasing, warehouse, sales, and finance with critical insights to better service customers.

Reduce Operational Costs

Lower costs associated with excess inventory, slow fulfillment and inefficient vendors. Evaluate suppliers, negotiate costs and improve vendor performance to enhance your overall operations.

Drive Incremental Revenue

Manage products, accurately control inventory, and ensure speedy warehouse fulfillment so you always have the right products in stock, at the right time.
