**Region:** United States (AMER)

**Headquarters:** Cincinnati, OH,

United States

**[sdriveapp.com](https://sdriveapp.com)**

### Overview

Records Management for higher education has never been easier. With CyanGate's Student Records Management on Salesforce, colleges and universities can distribute digital documents including financial aid forms, transcripts and more. Leveraging S-Drive, which is the top document management platform on AppExchange, higher education of any size to put a student portal with records management in place in no time.

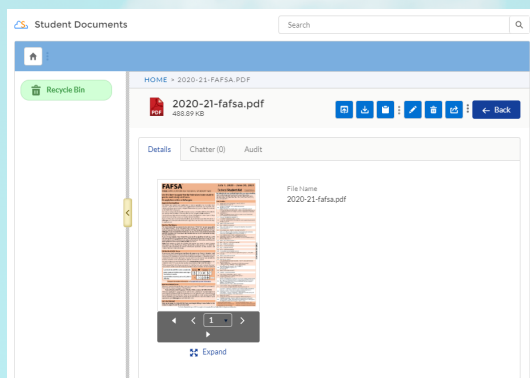

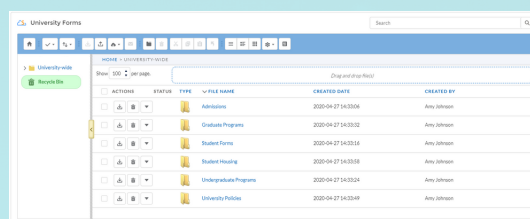

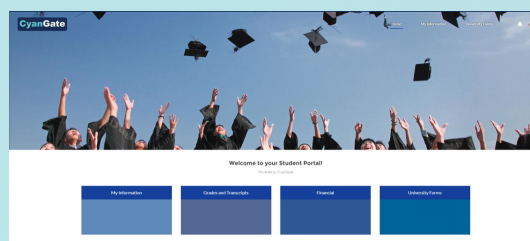

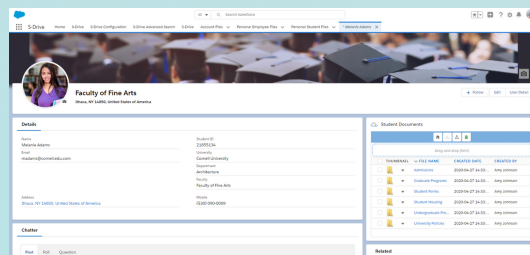

### Value Proposition

Student Records Management solution includes

- Ability to enable retention policies,
- Security to allow only authorized users to view/access student-related information,
- Powerful audit logging to keep record of every action,
- Integration to help accomplish Connected Campus

### Key Capabilities

- Reduce Student Communities go-live from 8-12 weeks to 8-12 days!
- Regardless of the size of the file, easily upload/download and manage content.
- Empower students to access everything they need without going through faculty.
- Give your students easy access to all university-related documents through Communities.
- Share private or class-related documents with students.
