

CyanGate

SALESFORCE SERVICES

STEP 1

Employ a methodical approach for assessing the Salesforce instance and bringing a report on how to go about implementing Lightning.

STEP 2

Use agile methodology to implement the solution based on a defined roadmap. Implementation will be done step-by-step to assure maximum impact.

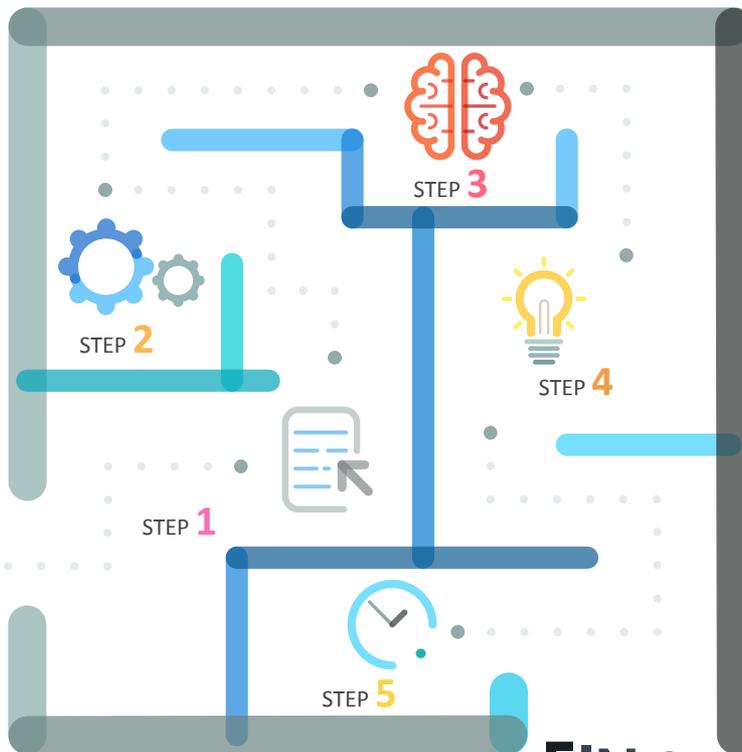

STEP 3

Provide on-going technical support to help develop better solutions. Depending on the business need, we can bring out-of-the-box solutions.

START

LIGHTNING MIGRATION

Lightning Migration Maze

FINISH

STEP 4

From documentation to communication, helping all users understand this new experience is very critical. CyanGate helps with the right way of introducing Lightning to users.

STEP 5

Lightning is not only a change in User Interface and User Experience. It is a change in the way business gets conducted. CyanGate is not only helping users understand reasons behind the change but also improving their productivity.

PLATFORM EXPERTISE

DOCUMENT MANAGEMENT

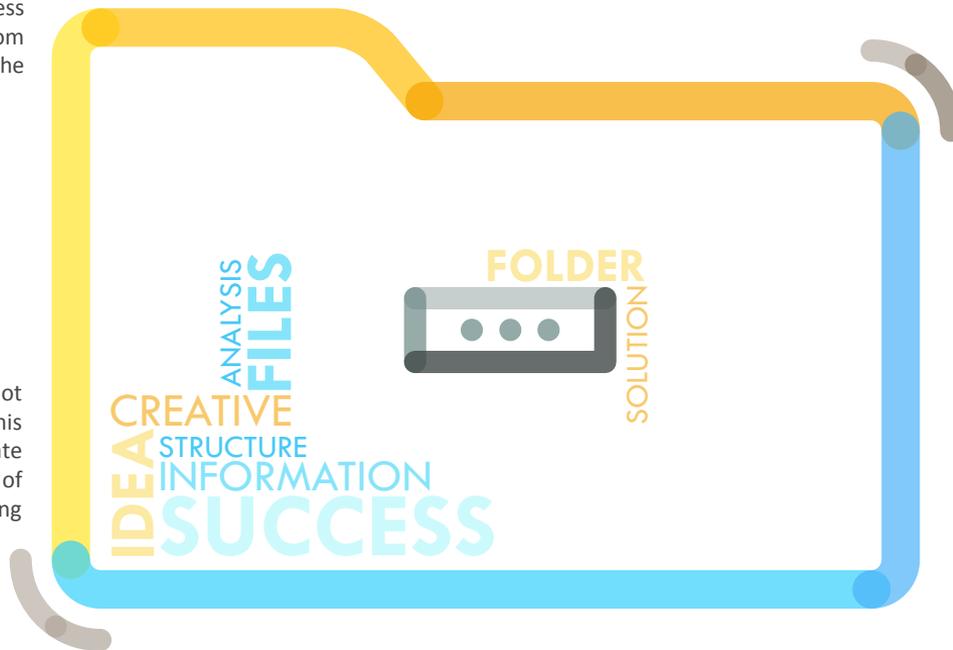

PROCESS ENABLEMENT

Regardless of how the approval process should work, CyanGate can build the custom solution to assure enablement of the approval process.

PROCESS AUTOMATION

If the business requirement is to upload a lot of documents in a given business day, this can turn into a mundane task. CyanGate helps with solutions assuring easy upload of document into Salesforce.com by building custom solutions.

DOCUMENT BACKUP

CyanGate can help build a solution to take a backup of current files and folders that are currently in use in CRM.

DOCUMENT ARCHIVAL

CyanGate can offer archiving documents based on a retention policy and assure automation of retiring documents used in CRM.
