Collecting data in the field got you down?

Tired of keying information off of handwritten forms into spreadsheets and reporting tools? Are you looking for a way to better understand how the results of your inspections impact you or your customers?

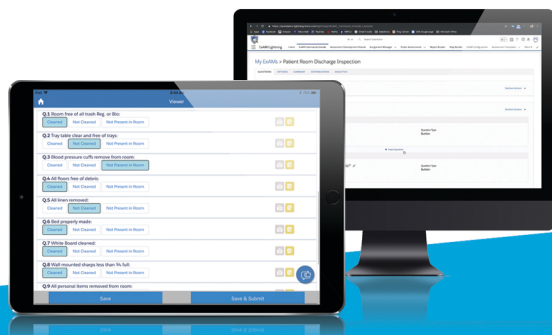

How we solve it

ExAM takes your inspections, quality assurance and field data collection online, enables you to automate tasks that result from your business processes and connects everyone across your organization to the information they need to support decision making and business process execution.

Industries and Use Cases

- 📍 **Health Care** - ExAM is used extensively in hospitals and medical facilities to support efforts including Environmental Management Services (EMS) Quality Assurance Inspection, Hand Hygiene & PPE Observation and many other use cases.
- 📍 **Public Sector** - Inspection and quality assurance inspections for key public sector use cases like the Department of Housing and Urban Developments UPCS-V housing inspections.
- 📍 **Facilities & Housing** - UPCS, HQS and other property and facilities inspections at more than 250 public housing authorities and inspections companies.

Key Features in the Field

- 📍 **Offline** - enables you to perform your inspections offline and in the field from your iOS or Android mobile device
- 📍 **Mobile** - easy to use iOS and Android apps that are available on your tablet or smart phone so that you have all your inspection information available at your fingertips
- 📍 **Powerful** - enables complex decision tree style inspections, more than 30 questions types, take pictures, video and collect signatures while in the field

Key Features in the Office

- 📍 **Advanced Reporting** - includes pre built reports and dashboards, intuitive analysis features and the ability to natively leverage advanced capabilities like Einstein's Predictive Analytics.
- 📍 **ExAM Command Console** - a comprehensive suite of tools for developing inspection, quality assurance and data collection forms and interfaces.
- 📍 **ExAM Configuration** - provides administrators with an easy to use interface for configuring the ExAM app to ensure your team gets the information they need in the field
- 📍 **Secure** - ExAM is used in secure federal and health care environments which is why we built it on Salesforce platform that meets stringent standard like FedRAMP, DoD IL4, HIPAA and many others.
