

KNOWN ISSUES

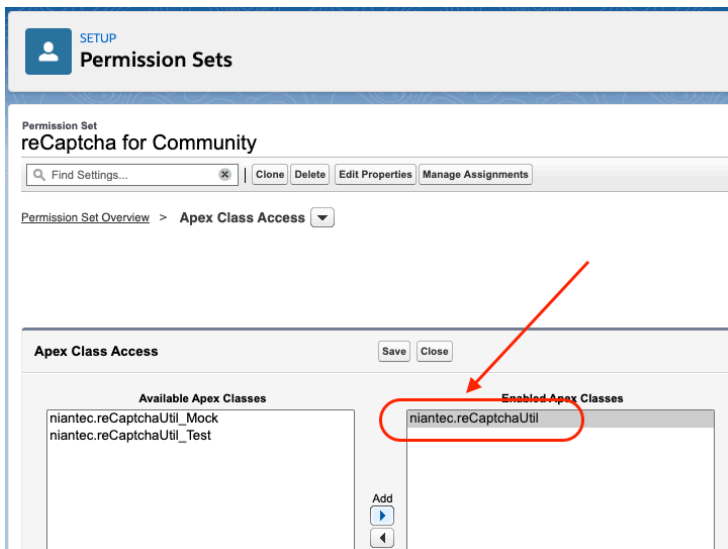

Issue 001: Some security features introduced by Salesforce with winter '21 upgrade have caused reCAPTCHA to stop working.

Please follow these instructions to workaround the issue.

- ✓ Add “*niantec.reCaptchaUtil*” Apex class to the permissionset “*reCaptcha for Community*”.

Steps:

1. Navigate to Setup —> Permission Sets
2. Click “reCaptcha for Community”
3. Click “Apex Class Access” and click “Edit”
4. Add “niantec.reCaptchaUtil and “Save”

- A bug has been raised and the issue will be fixed in the next release.
