Lightning Custom Themes

Region(s): US, UKI, RoEMEA, ASEAN, INDIA

Headquarters: Navi Mumbai, MH, India

Website: www.hexaware.com

Overview

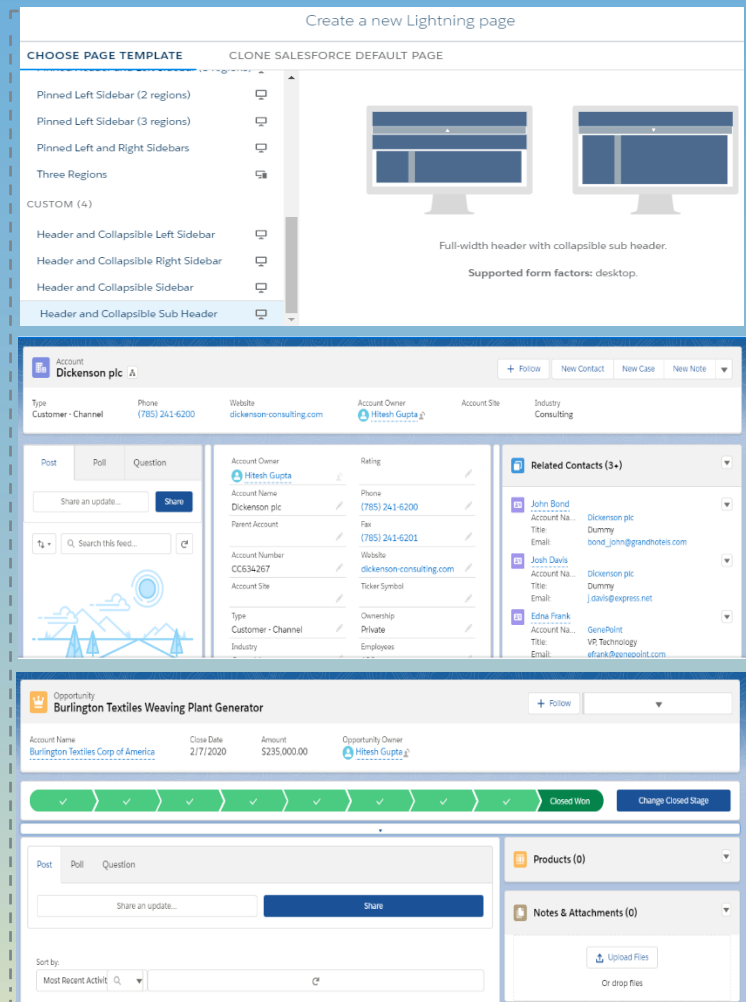

Normally while building custom solutions for any customer, we need to have dynamic and rich user interface to provide an amazing customer experience. With an improved user interface and flexibility, it ultimately helps grow business for our customers.

Value Proposition

These ready-to-use themes would allow development teams to easily build dynamic user interface, ultimately reducing time needed to implement any custom solution. End-users would be able to expand/collapse page sections with just a click, hence improving readability and efficiency.

Key Capabilities

- Collection of various formats of dynamic custom themes that a developer can use on lightning app builder pages as well as community layouts.
- Flexible expandable and collapsible sections for easy viewing and dynamic user experience. Improves readability for users.
- Multiple layout options for Salesforce internal application as well as community portal usage.
