

Risk Management

MANAGE WORKPLACE SAFETY AND ENVIRONMENTAL RISK TRACKING, EVALUATION, MITIGATION AND MONITORING PROCESSES EFFICIENTLY

**CONTROLLING RISKS IN
ENVIRONMENT, HEALTH & SAFETY**

RISK MANAGEMENT

ComplianceQuest understands that the most important role of the EHS professional is to create a safety culture that proactively mitigates workplace safety risks and environmental hazards. In order to effectively put preventative measures and controls in place an enterprise risk management solution is required to provide a complete and accurate picture of the risk landscape of complex business processes across global locations.

Additionally, ISO 45001 has always advocated identifying, evaluating, mitigating, monitoring to lead to a culture of avoid risk. The standard implicitly calls for addressing issues through preventative actions to address risks and opportunities.

The ComplianceQuest Risk Management Solution is an integral part of a comprehensive EHS management system.

RISK INTAKE PROCESS

ComplianceQuest brings together all risk-related documentation in a single location through integration of the risk assessment for your Job Safety Analysis, Field Level Risk and Environmental Aspects and Impacts. The solution allows for configuration of multiple risk types for evaluating different categories of operational risk.

RISK ASSESSMENT AND STANDARDIZED RISK ANALYSIS CAPABILITIES

Risk assessments can be launched from anywhere within the ComplianceQuest system to analyze hazards associated with any process or activity. The solution provides a framework for defining operational risk tolerance thresholds and policies complying to these thresholds are employed and followed for risk assessment and required analysis across the organization.

RISK MITIGATION

Solution provides employees from different departments with a simple and efficient method for participating in risk mitigation activities. ComplianceQuest Risk offers electronic workflows and signatures for evaluation, mitigation plan definitions, execution, review, and approval of risk activities and documentation.

RISK MONITORING

Each mitigated risk can be monitored to ensure that the mitigation activities have done what they are supposed to as you put in place the proper safety and environmental controls for your worksite.

INCREASED MANAGEMENT OVERSIGHT

The software's standard methodology simplifies the application of resources in the most risk-prone areas. The ComplianceQuest Risk solution ensures that organizational risk tolerance is not exceeded.

COLLABORATION

Reach out to others across the enterprise and in the supply chain to solicit feedback without having to give up on the ownership of the tasks.

MOBILE ACCESS

Access your EHS Risk Management Solution on the go anywhere, anytime and on any device. Complete access to the solution including reports, approvals, record views, reviews, alerts, etc. ensures business continuity and improves efficiency, visibility and flexibility.

SOCIAL LIKE & FOLLOW

Like and follow relevant records in the system. Choose to be notified via email, dashboard, and mobile to stay abreast of developments.

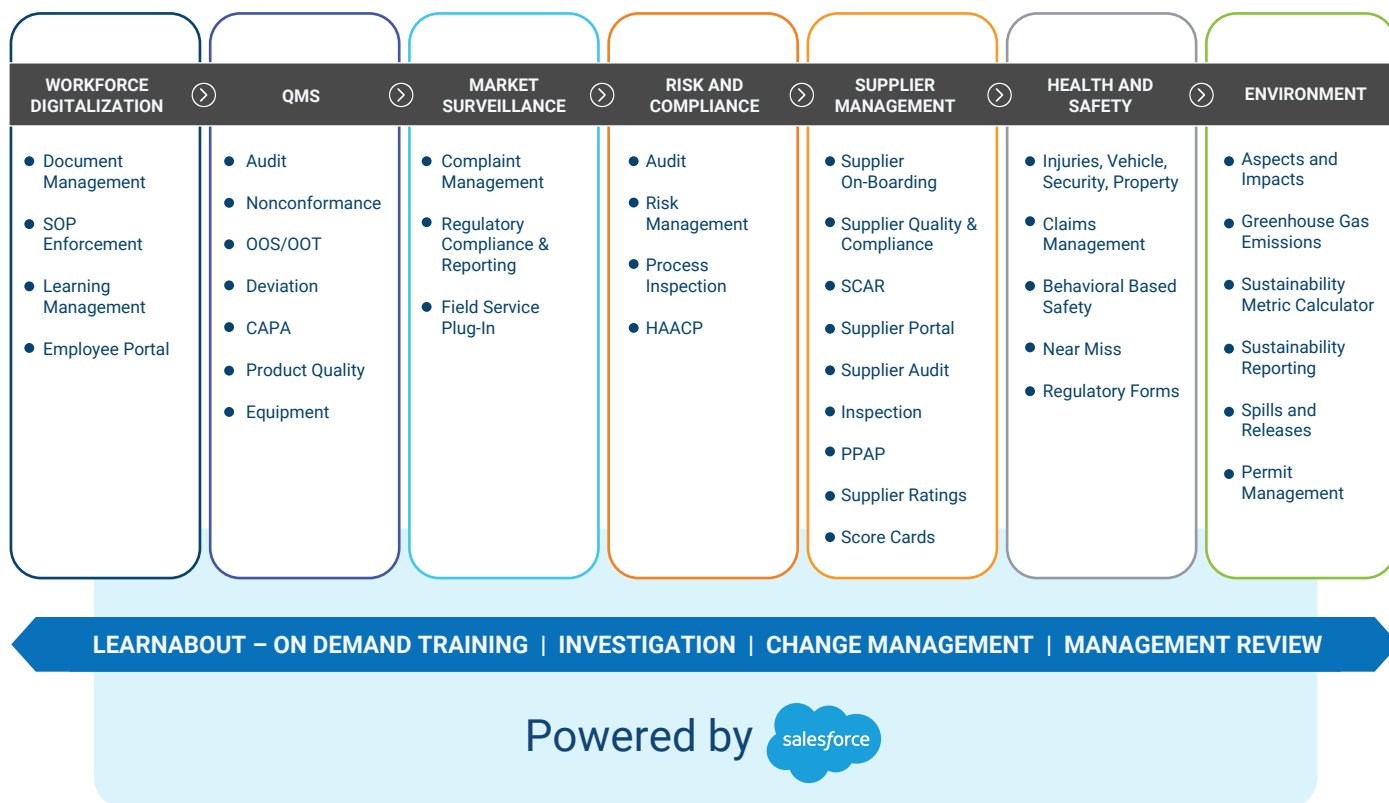

REPORTING AND ANALYTICS

Utilize pre-developed best practices-based reports. Create any number of additional reports and dashboards to suit your requirement. Information is easily retrievable, helping you make quick decisions.

Our EQMS and EHS Solution Platform – Connected and Unified
