CQ Enterprise QHSE Suite - One Seamless Connected Platform

Modules implemented

- Safety event management
- Risk and controls
- Worksite and equipment inspections
- Project scheduling

Quality | Safety | C

What problems were you looking to address by digitizing your Health and Safety process?

- Manual, paper-based system
- Decentralized, non-automated processes
- Lack of accountability and transparency
- Insufficient data for decision making

Describe the software implementation

- Mostly delivered remotely
- On-site UAT and training
- Immediate install and then 12 week process customization
- Mobile ready
- Quick time to value

What value was created?

- Achieved zero incident rates
- Cloud-based, mobile capabilities
- Real-time access to safety data
- Reduced risk
- Increased workplace safety

Griffin has seen a steady decline in incidence rates and by 2020, they reached Zero

Incident Rate Reductions

	2016	2020
TRIR (total recordable incident rate)	2.89	0
DART rate (days away, restricted, or transferred)	2.41	0
VAR (vehicle accident rate)	11	5

EHS Solution went live in 2017

A person wearing a dark suit and an orange safety vest with reflective yellow stripes is sitting at a wooden desk. They are typing on a silver laptop. On the desk, there are several rolled-up white documents, a pair of glasses, and a calculator. In the background, an orange hard hat is visible. A large, semi-transparent white circle is overlaid on the left side of the image, containing the word "DEMO" in bold black capital letters.
