

Three simple steps to install Tok on your desktop

Whether you are using Windows or MacOS, there is a simple way to install Tok.

VersionTok / 1.185.0

Step 1.

- For Mac users : [Download Tok from the App Store.](#)
- For Windows users : [Download Tok from the Microsoft Marketplace.](#)

Step 2.

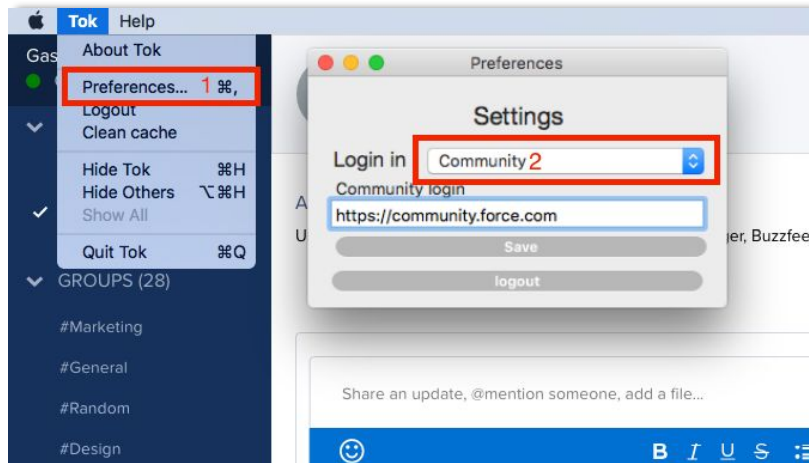

Your Community should be already created.
If you haven't had a chance to create it yet, find the
“**Oktana's guide to Create a Community and add users**”
in [this link](#) for detailed instructions.

Step 3.

Now it's time to link your community.:

1. Go to **Tok>Preferences** in the Tok menu.
2. You will see a window where you can **set your community value to your community URL** (Screenshots on the next page).
3. Click **Save** and that's it.

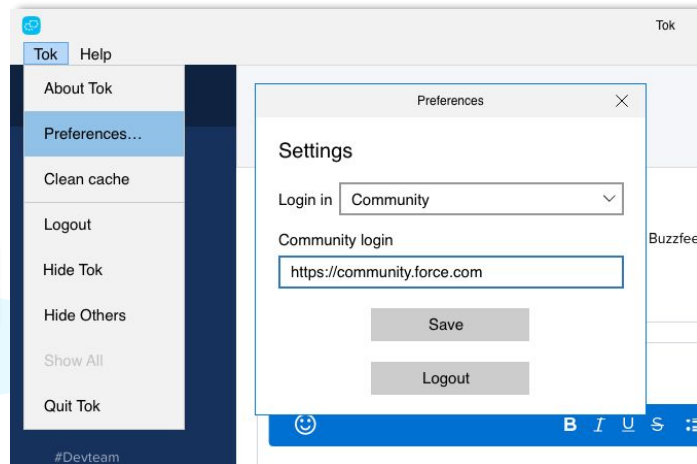

Screenshots are on the next page.

***This is what you will see
if you are a Mac user.***

***This is what you will see if
you are a Windows user.***

tok

Congratulations!

Now it's time to enjoy secure,
real-time chat across your company.

tok

Thank you for using Tok.

If you need support or if you are looking for extra information, please contact us. We're happy to help.
